PREFACE

This Report provides general data and analyses of data from the most recent Census of the Kingdom of Tonga at midnight 30 November 1996. The data and information contained in this Report will help decision makers in Tonga understand the current socio-economic conditions in the Kingdom of Tonga.

This first volume presents the administrative report on the Census plus an analysis of the Census results specifically the G-Series or the General Tables. Other Series namely M-Series (Migration), H-Series (Household) and D-Series (Demographic) will appear in separate volumes at a later date.

Part I of this Report is the Administrative Report with Chapter 1 providing background information on the Kingdom of Tonga, some history of Census taking in Tonga and the operations of Census 1996; Chapter 2 provides the analysis and main findings of Census 1996; and Chapter 3 gives the Definitions and Notes. Part II consists of the Statistical Tables and Part III contains the Appendices which comprises of the Census forms, Instruction Manual for Enumerators, ISCO-88 and ISIC-90.

A lot of people and organisations contributed significantly towards the successful conduct of the Census for which they are acknowledged. Mrs 'Ilaisaane T. Pongi, Government Statistician for initial planning of the Census; Mr Laurie Lewis of the UNFPA CST Suva Office for advise on questionnaire design; Dr Gerald Haberkorn of the Secretariat of the Pacific Community and Mr Nick Bale, VSO from the United Kingdom for assistance at the planning stages as well as questionnaire design; and staff of the Statistics Department for all their hard work during all stages of the Census. The assistance of Mrs Mele P. Finau, Senior Statistician in the preparation of this Report is also acknowledged.

Special thanks must be extended to the Ministry of Education for making available primary school teachers and school principals to act as enumerators and supervisors. Other Government Departments, Quasi-Government organisations and Private organisations who offered valuable support as well as financial support is gratefully acknowledged.

Finally, thanks are due to all the people of Tonga to which this Report is dedicated, for their willing cooperation and support which has contributed towards the successful conduct of this national undertaking.

TABLE OF CONTENTS

Preface

PART I ADMINISTRATIVE REPORT

| CHAPTER 1 | BACKGROUND | vi-xi |
|-----------|-----------------------------------|----------|
| 1.1 | Introduction | vi |
| 1.2 | History of Census Taking in Tonga | vi |
| 1.3 | The 1996 Census | vi-vii |
| 1.4 | Census Design | vii-viii |
| 1.5 | Census Instruments | viii |
| 1.6 | Mapping and Prelisting | viii-ix |
| 1.7 | Enumeration | ix-x |
| 1.8 | Post enumeration | Х |
| 1.9 | Data Processing | x-xi |

CHAPTER 2 MAIN FINDINGS

2.1 Introduction

2.1.1 General

- 2.1.2 Population Distribution
- 2.1.3 Population Growth
- 2.1.4 Age and Sex Characteristics of the Population

2.2 Social Profile of the Population

- 2.2.1 Marriage
- 2.2.2 Ethnicity
- 2.2.3 Religion
- 2.2.4 Education
- 2.2.5 Literacy

2.3 Economic Activity

- 2.3.1 Economically Active Population
- 2.3.2 Non-economically Active Population
- 2.3.3 Employed Population
- 2.3.3.1 *Employed Population by main economic activity*
- 2.3.3.2 *Employed Population by employment status*
- 2.3.3.3 *Employed Population by occupation*
- 2.3.3.4 *Employed Population by industry*
- 2.3.4 Unemployed Population

CHAPTER 3 DEFINITIONS AND NOTES

PART II STATISTICAL TABLES

| Table G1 | Total population by division, district and village by sex by age group and by number of households | 1-4 |
|-----------|---|-------|
| Table G2 | Total population by division and island by sex by population density and by number of households | 5 |
| Table G3 | Total population by sex, division, Nuku'alofa and Greater Nuku'alofa and by ethnicity | 6 |
| Table G4 | Total population by sex and five year age group for division, Nuku'alofa and Greater Nuku'alofa | 7 |

| Table G30 | Non-Tongan employed population aged 15 years and above by sex by occupation and by ethnicity | 45 |
| Table G31 | Non-Tongan employed population aged 15 years and above by sex by industry and by ethnicity | 46 |

PART III APPENDICES

| Appendix 1 | Instructions regarding Pre-Listing of Households | 47-48 |
|------------|---|-------|
| Appendix 2 | Pre-Listing of Households Form | 49 |
| Appendix 3 | Household Schedule | 50 |
| Appendix 4 | Individual Questionnaire | 51 |
| Appendix 5 | Enumerator's Instruction Manual | 52-67 |
| Appendix 6 | International Standard Classification of Occupation, 1988 | 68-77 |
| Appendix 7 | International Standard Classification of Industry, 1990 | 78-80 |

1.1 INTRODUCTION

A national population census may be thought of as a "stock-taking" of the whole country, particularly of its most precious resource, its people. It is not just a count of people. Information is needed on the structure of the population for instance, the number of males and females and their ages together with a variety of other characteristics related to their civil and economic status. Information on education, migration, work and employment are needed also for measuring the progress made over the last ten years in educating the population, in using their skills and developing the economy so that the quality of life in Tonga is improved and the national development objectives achieved.

Successful national planning for the future needs of children for schools and trained teachers, of young people for employment and of older people for a rewarding retirement, is related to the availability of accurate information about the numbers and characteristics of these groups now and in the projected future.

1.2 HISTORY OF CENSUS TAKING IN TONGA

A national population census has been taken in Tonga on a regular basis since 1921, although there were counts much earlier than this, going back to as early as 1891. Since World War II censuses have been taken once every ten years beginning in1956. The 1996 Census continues this series of decennial censuses.

The table below shows a summary of population figures from previous censuses prior to the 1996 census.

| Year | Total Population |
|------|------------------|
| 1891 | 19,196 |
| 1956 | 56,838 |
| 1966 | 77,429 |
| 1976 | 90,085 |
| 1986 | 94,649 |
| 1996 | 97,784 |

1.3 THE 1996 CENSUS

The 1996 Census was conducted under the authority of the Statistics Act Cap. 53 Section 8. Under this Act the Minister of Finance is empowered to make regulations necessary to conduct the population Census. In August 1996 the Census Regulations 1996 were issued declaring that a population Census of the Kingdom of Tonga would be taken on the 30 November 1996 and all persons within the Kingdom and its territorial waters at midnight

on that date were to be enumerated. The Census Regulations also announced that the Government Statistician would be responsible for administration and completion of the Census. Since the substantive Government Statistician was away on leave effective from July 1996, the Acting Government Statistician, Mrs Seini M. Filiai was responsible for the administration and completion of the Census.

The Census Regulations also enabled the Statistics Department to carry out the necessary activities required to ensure a successful Census.

A Census Steering Committee was formed to review the plans and arrangements for the Census and make suggestions for their improvement and liaise between the Census organisation and the organisations they represented. The Census Steering Committee was chaired by the Secretary for Finance, Mr 'Aisake V. Eke and comprised representatives from various Government departments, the churches, non-government organisations and businesses.

It was necessary to organise staff of the Statistics Department to carry out the Census, with the Senior Statistician, all Statisticians and Senior Statistical Assistants participating as trainers of supervisors and enumerators. Most statistical clerks in the Department also participated either as a trainer, enumerator or supervisor. A small working committee comprising of the Acting Government Statistician, the Senior Statistician (Mr Sione 'I. Mosa'ati), two Statisticians (Miss Mele Polutele and Mrs Tipaleli Hoponoa), and the VSO from the United Kingdom (Mr Nick Bale) met regularly to finalise and monitor all stages of the Census operation.

The success of the 1996 Census was attributed to the excellent team spirit and cooperation among staff of the Statistics Department and the successful publicity program that created a high degree of public awareness and cooperation.

1.4 CENSUS DESIGN

The design of the Census to a large extent followed that for earlier censuses so that comparability with results of earlier censuses is retained. Census information was obtained through interviews with each household. A preliminary interview was conducted immediately before the Census and a second interview immediately after to confirm the information collected in the first interview.

The 1996 Census followed the 1986 Census and included all persons who were actually in Tonga or Tongan territorial waters on Census night. This approach often refered to as the **de facto** approach was consistent with censuses prior to 1976 and was far easier to implement. In each household interviewed, the enumerator was only concerned with counting persons who spent Census night in the household. No questions were asked about people who spent Census night elsewhere.

The 1996 Census incorporated other changes too with new questions included and some concepts modified. The mapping of Census Blocks to assist enumeration was greatly improved over the 1986 Census. Data processing development since 1986 meant that appropriate computer hardware and software were available in the Statistics Department

together with trained staff in Census data processing enabling the processing of the entire Census in Tonga.

1.5 CENSUS INSTRUMENTS

It is important in a Census to measure changes that occur over a long period. Many questions asked in previous censuses were again included in 1996. However users needs change over time and statistical methodologies and concepts improve resulting in a demand for new kinds of information. There are also some important differences between the 1986 and 1996 questionnaires. These are important since it means that in some cases the results of the 1996 Census cannot be compared directly with results from earlier censuses.

There were changes made in the types of questions asked in the Household Schedule of 1996 depending on requests from users. Information on the type of building was similar to that asked in the 1986 Census where only the main building was required. There was a change in the 1996 Census concerning source of water supply, type of latrine, source of energy for lighting and for cooking, where households were asked to indicate all sources and types available in each household; in the 1986 Census, households were asked to indicate only the main source and type available in each household. For household goods, a computer was added to the 1996 list, washing machine was not included, and motor vehicle was included instead of motor cycle, truck and car. New questions that were included in the 1996 Census and not in the 1986 Census were questions on livestock, whether crops or squash have been grown in 1996, and method of household waste disposal. These changes were made in order to incorporate user needs.

On the Personal Questionnaire, the only new questions asked in 1996 and not in the 1986 Census were questions on literacy in English and Tongan. Specific questions to capture persons aged 15 years and over who were engaged in farming, fishing and making handicrafts and the purpose of participation in these activities were also asked in the 1996 Census. The migration questions were reduced to place of usual residence and length of residence in this location whereas five questions were asked on migration in the 1986 Census.

1.6 MAPPING AND PRELISTING

Modern mapping equipment was acquired from Australia for drawing of census block maps. A total of 442 census block maps were drawn for the whole of Tonga with each census block assigned to an enumerator for Census enumeration. Census block maps showed essential features for conducting the Census and clear boundaries between Census blocks as well as useful features such as churches and roads that would help enumerators locate households and buildings shown on the maps. The Statistician in charge of mapping visited major residential areas of growth since 1986 for confirmation of boundaries of census blocks in Tongatapu, Vava'u and 'Eua.

In order to establish a firm framework to ensure that census coverage is complete, a prelisting exercise was undertaken. The prelisting involved enumerators identifying every

Household within a census block, locating households by numbers on the map and establishing the name of the Head of Household. A Household consisted of persons who usually eat together and share the work of preparing the food and/or the cost or work of providing it. Normally a household was thought of as a unit with its members living together, eating and sleeping in the same building. It was important that all persons enumerated were always assigned to a single household.

1.7 ENUMERATION

As in earlier censuses, school teachers were used as enumerators and supervisors. As far as possible teachers were used in their own villages or island where their intimate knowledge of the area and the community, especially children was of great benefit. A team of trained statistical clerks in the Statistics Department were on standby for assistance with enumeration in cases where enumerators could not complete enumeration of their assigned census blocks.

Each enumerator was given a map of his or her Census Block. After intensive training by Statistics Department staff, the enumerators began the first stage enumeration on 25 November 1996. Some enumerators took more than one day to complete the prelisting exercise. The Census was declared as midnight on the 30 November. Census enumeration was conducted using a two visit system with the first visit during 29 and 30 November. In the first visit, details of households as on PC-2 was completed as well as a PC-3 for every person who will be in the Household on Census day. The second visit took place on 2nd and 3rd of December for confirmation of information supplied on the first visit. With the 1st of December being a Sunday, no Census work was undertaken on this day.

Once enumeration was completed, the enumerators passed on their completed questionnaires to the supervisors for finalisation. A supervisor was assigned to each of the 23 Districts who was either a head teacher or principal or a staff member of the Statistics Department. The supervisors were required to provide guidance to enumerators in the field in order to ensure that coverage was complete and to check completed questionnaires for accuracy. Where enumeration was incomplete or unsatisfactory, the supervisors instructed enumerators to rectify and if necessary to revisit households for additional information.

The field work was supported by an intensive publicity programme which began months before actual enumeration. The press and radio played an important role in creating public awareness of the Census and its purposes, but support was also excellent from the use of posters and television. The media team from the South Pacific Commission produced a 6 minutes Census video clip which TV-7 in Nuku'alofa kindly agreed to put on air as a public announcement and therefore free of charge. The Census logo was "**Be Counted**" and a Census theme song was also composed and broadcast on radio during the months leading to the Census. The whole publicity campaign was fully funded by local sponsors which the Statistics Department had sought for financial support. As a result of this efficient publicity programme, the awareness and cooperation of the public was excellent which consequently led to a high coverage of the Census. Results of the post-Enumeration Survey which was conducted one week after actual Census

enumeration indicated a complete coverage of all households and individuals in the actual Census.

1.8 POST-ENUMERATION SURVEY

Two Census Blocks were selected for the Post-Enumeration Survey, one in Kolomotu'a village to represent the urban area and one in Nukuleka village to represent the rural area. The post-enumeration count in both Census Blocks recorded more people than counted in the actual census enumeration. This indicates the high mobility of the Tongan population as well as a good coverage of census enumeration.

1.9 DATA PROCESSING

For the very first time, the Census results were processed and tabulated in-house by staff of the Statistics Department under the capable supervision of Miss Mele Polutele, Statistician. The Statistics Department has acquired the capability not just in data processing but also in Census taking which has enabled the successful conduct of the 1996 Census, as well as timely release of Census results. The release of the preliminary Census results in January 1997, only 7 weeks after the declared Census day is evidence of this firm capability.

The Australian government kindly donated three computers, one laser printer and one dot matrix printer for processing of Census results.

On arrival at the Statistics Department, Census forms were checked and responses coded for entry to computers. Data entry was performed by three staff members of the Statistics Department namely Mrs 'Ana P. Fifita, Computer Operator Grade1, Miss Tupou Tausisi, Temporary Computer Assistant, and Mr 'Olini Sapoi, Temporary Computer Assistant. Mrs 'Ana P. Fifita also did the editing of the Census database before the final editing programme was run. Data entry, editing and tabulation of Census results were done using IMPS, an Integrated Microcomputer Processing System developed by the US Bureau of the Census. The set of General Tables were produced using IMPS and imported to Excel for final formatting.

The programme for final editing of the Census database was written by Dr Michael Levin from the US Bureau of the Census during his two days visit to the Statistics Department.

The Statistics Department will produce a series of tables from the Census by subject matter which will be published with some analyses in separate publications. These series will include a Migration series, a Household series and a Demographic series. Users may request special tables of interest which the Statistics Department will gladly produce.

To assist users further, this first volume includes a short descriptive analysis of the major findings of the Census. It is recognised that many users need to have immediate access to Census results hence the special effort made by the Statistics Department to have Census results released to users as soon as possible.

2.1 INTRODUCTION

2.1.1 General

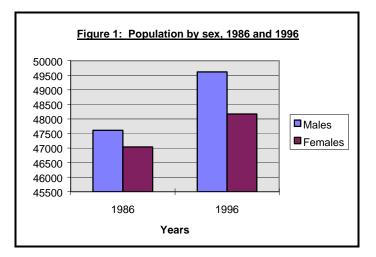

According to the Population Census conducted in November 1996, there were 97,784 persons counted in Tonga. This count was made up of 49,615 males and 48,169 females (see Table 1), or to express it as a Sex Ratio, 103 males to every 100 females. In the 1986 Census, there were 101 males to every 100 females.

Table 1: Population by sex, 1986 and 1996

| Year | Male | Female | Persons | Sex Ratio |
|------|--------|--------|---------|-----------|
| 1986 | 47,611 | 47,038 | 94,649 | 101.2 |
| 1996 | 49,615 | 48,169 | 97,784 | 103.0 |

(Sex Ratio is the number of males to every 100 females)

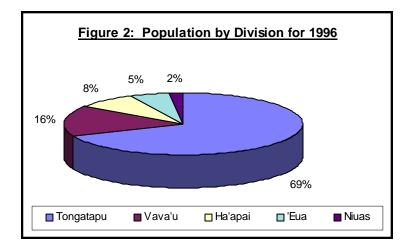

The distribution of the population by gender is clearly illustrated in Figure 1, showing many more males than females in 1986 as well as in 1996.

2.1.2 Population Distribution

The distribution of population over the five Census Divisions of Tongatapu, Vava'u, Ha'apai, 'Eua, and Niuas has remained about the same as in the 1986 Census (see Table 2). The largest Census Division was Tongatapu where 68.5 percent of total persons were counted. The next largest Census Division was Vava'u, where 16.1 percent of persons were counted. Of the remaining Census Divisions, Ha'apai had 8.3 percent of the

population, 'Eua had 5.0 percent and the Niuas 2.1 percent. The population distribution over the five Divisions is clearly presented in Figure 2.

2.1.3 Population growth

Since the 1986 Census, the population had grown by 3.3 percent, with an average annual growth rate of 0.3 percent over the 10 year period. The low growth rate reflects the high migration of people away from Tonga. 'Eua, the second smallest Census Division had the largest average annual growth rate, growing by 1.2 percent annually since the previous census. Although Tongatapu's growth rate was 0.5 percent, it had slowed down from an annual growth rate of 1.1 percent recorded in 1986. The average annual growth rate for Vava'u was just below that for Tongatapu, at 0.4 percent. Ha'apai continued the downward pattern exhibited in the 1986 census, declining on average by 0.9 percent every year since 1986. The annual rate of growth for Niuas declined by 1.5 percent every year since 1986. Details of the average annual growth rates in each Division is given in Table 2.

| Table 2: Population by Divisions and average annual rates of growth, |
|--|
| 1986 and 1996 |
| |

| Division | 1976 | 1986 | 1996 | Average annual | growth rate (%) |
|-----------|--------|--------|--------|----------------|-----------------|
| | | | | 1976-86 | 1986-96 |
| Tongatapu | 57,411 | 63,794 | 66,979 | 1.1 | 0.5 |
| Vava'u | 15,068 | 15,175 | 15,715 | 0.1 | 0.4 |
| Ha'apai | 10,792 | 8,919 | 8,138 | -1.9 | -0.9 |
| 'Eua | 4,486 | 4,393 | 4,934 | -0.2 | 1.2 |
| Niuas | 2,328 | 2,368 | 2,018 | 0.2 | -1.5 |
| TOTAL | 90,085 | 94,649 | 97,784 | 0.5 | 0.3 |

The low annual growth rate of only 0.3 percent means that Tonga continues to loose people through overseas migration. A useful measure is that of <u>net migration</u> which, in the case of Tonga, will measure the excess of emigrants and visitors to other countries over immigrants, returning Tongans and tourists to Tonga. It is useful because it shows whether a country gains or looses people as a result of migration.

In the absence of migration, population growth would be the excess of births over deaths. The Census can be very useful as a way of measuring the birth and death rates.

In the meantime it is possible to gain an approximate idea of the birth rate from the age distribution at the Census. From the 0-4 age group, we can assume that 2,696 were aged 0 or have not reached their first birthday. We can then obtain an average of 27 births per 1000 head of population for 1996. Since registration of deaths is known to be highly under-recorded, we can assume a death rate of 6.5 per 1000 head of population.

In Table 2 it was seen that the average annual growth rate between 1986 and 1996 was 0.3 percent, or to express it in the same way as the birth rate, about 3 persons for every one thousand population. This rate is known as the <u>inter-censal</u> rate of growth. The difference between the rate of natural increase, which does not take account of migration, and the intercensal rate of growth, which does take migration into account, will provide an approximate measure of <u>net migration</u>. Table 3 shows that this rate was about 17.5 per thousand.

| | per thousand population |
|-----------------------------------|-------------------------|
| 1. Birth Rate | 27.0 |
| 2. Death Rate | 6.5 |
| 3. Rate of Natural Increase (1-2) | 20.5 |
| 4. Intercensal rate of Growth | 3.0 |
| 5. Net Migration Rate (3-4) | 17.5 |

 Table 3: Approximate Growth Rate 1986 - 1996

While the Census can be used to make a broad estimate of overseas migration, it is better at measuring internal migration within Tonga. An analysis of internal migration will be undertaken and published at a later stage.

2.1.4 Age and Sex Characteristics of the Population

The age and sex characteristics of the population are among the most important information collected in the Census. They are important demographically because their patterns reflect current and past influences of births, deaths and migration. They are also essential in helping to explain social and economic activities. Many of these activities such as whether a person attends school or the kind of work someone does, are very closely related to age and to a lesser extent, to sex.

2.1.4.1 Evaluation of Age data

2.1.4.1.1 Single years of age

2.1.4.1.1a Myers' Index

One of the ways of evaluating the age reporting at census time is to calculate the Myers' Index. The index will show whether there are preferences for certain digits. The overall value of the index is shown in Table 4. The value of the index ranges from 0 which shows no preference for any digit, to 90 which shows preference for a single digit. There is very low preference for any digits in the Tongan 1996 census as revealed by the values of the Myers' Indices for males and females with 4.4 and 5.2 respectively.

| | Male | Female | Total |
|-------|------|--------|-------|
| Index | 4.4 | 5.2 | 4.8 |
| | | | |
| 0 | 0.4 | 0.3 | 0.4 |
| 1 | -0.2 | -0.5 | -0.4 |
| 2 | -0.5 | -0.5 | -0.5 |
| 3 | -0.3 | -0.3 | -0.3 |
| 4 | 0.2 | 0.6 | 0.4 |
| 5 | -0.4 | -0.3 | -0.4 |
| 6 | 1.4 | 1.2 | 1.3 |
| 7 | -0.1 | -0.2 | -0.2 |
| 8 | 0.3 | 0.4 | 0.3 |
| 9 | -0.6 | -0.8 | -0.7 |

Table 4 : Digit preference by sex, 1996

However, these appears to be a slight preference for digit 6 among both males and females. It is interesting to note that this is also the case in the 1986 census. Perhaps this is a function of the census taking place in a year ending in '6'. Respondents when queried about their date of birth, would tend to report a year rounding in '0' which, when converted to an age, would yield an age ending in '6'. There is no preference for any other digits.

MYERS METHOD

2.1.4.1.2 Grouped age and sex data

2.1.4.1.2a Age-sex accuracy index

Apart from evaluating the single years of age, the grouped data was also evaluated. The errors present in the singles years of age data are minimized when age data are grouped. The method used in evaluating the 5-year age groups by sex are the UN age-sex accuracy index and the age-sex ratios. These are presented as Table 5.

| | Population | | Age Age ratio ratio deviation | | Sex ratio (males per | | |
|--|------------|--------|----------------------------------|--------|-------------------------|--------|--------------|
| Age | Male | Female | Male | Female | Male | Female | 100 females) |
| - | - | - | - | - | - | | - |
| All ages | 49,615 | 48,169 | | | | | 103.0 |
| 0-4 | 6,987 | 6,492 | | | | | 107.6 |
| 5-9 | 6,539 | 5,719 | 97.1 | 91.3 | -2.9 | -8.7 | 114.3 |
| 10-14 | 6,482 | 6,039 | 106.7 | 109.8 | 6.7 | 9.8 | 107.3 |
| 15-19 | 5,609 | 5,286 | 102.7 | 102.5 | 2.7 | 2.5 | 106.1 |
| 20-24 | 4,445 | 4,277 | 92.8 | 94.3 | -7.2 | -5.7 | 103.9 |

Table 5: Population by Age and Sex, and United Nations Age-Sex Accuracy Index, 1996

The ratio at each age group should be equal to 100 if there had been no extreme fluctuations in the past birth, death and migration rates. Any deviation from 100 reveal data quality problems. For males, the age group with highest deviation is the age group 35-39 although age groups 10-14, 20-24, 25-29, 45-49 and 55-59 also show relatively

large deviations. Among females, however, age groups 0-4 and 5-9 show the highest deviations while age group 30-34 also show relatively large deviation. It is difficult to attribute this trend to data quality alone given the high level of migration in Tonga. The deviations therefore could be caused by migration patterns among both sexes.

2.1.4.1.2b Age-sex ratios

Another way of evaluating the age and sex data is through the sex ratios. For a population that does not experience international migration, sex ratios are expected to decline with age, the effect of sex ratio at birth and age-sex selective patterns of mortality. But because international migration has had a major impact on the population of Tonga, sex ratios are not expected to follow this trend. This is revealed in Table 2 where sex ratios are over 100 (depicting more males than females) up to age group 30-34 and then dips drastically to between 80 and 90 for age groups 35-39 to 50-54 and then in the oldest age group 75+.

Except for the 'bump' in the age group 5-9 and the 'dips' in the age groups 35-39 to 50-54, the sex ratios among the remaining age groups decline as age increases. The irregular sex ratios depicted by these groups are most probably caused by selective migration patterns experienced by them rather than the data quality.

The age distribution indicates 13.8 percent of the population were under 5 years old and 3.1 percent were aged 70 years and over. More than half or 50.2 percent of the population were aged 19 years or less, indicating a very young population. The population aged 15 - 64 years made up 55.7 percent of the total population.

In Table 5 the effects of births, deaths and migration on the age and sex structures of the population enumerated in 1996 is evident. Birth rates in the recent past remain relatively high since there were still more children counted in the 0-4 than 5-9 age group. The age at census provides information as to when those births occurred. The age structure reflects the rate at which people die as they age. Without taking migration into account, mortality would explain why the number of persons at young ages (where few had died) was relatively high and the number at older ages (by which time more had died) was relatively lower.

The population structure in Table 5 however shows some irregular features. The decline in numbers of persons as the age groups increase is not smooth and in many instances reflects the effects of migration. For example the number of persons in the "5 to 9 years" age group is less than the "less than 5" and the "10 to 14 years" age group, clearly showing the impact of migration.

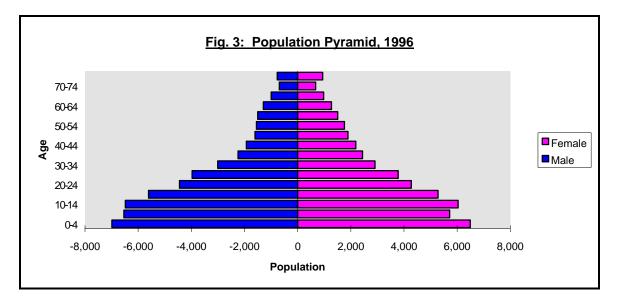

The differences between the sexes further demonstrates the importance of migration. At younger ages, the sex ratio (i.e. number of males to every 100 females) ranges between 106 and 114, reflecting the sex ratio at birth of 108. The reduction in sex ratios, particularly between ages 35 to 54 years, can be partly explained by selective migration - as males seek education and work overseas as well as higher mortality of males through early adulthood. The sex ratio of only 81.4 males to every 100 females in the 75 years and over indicates that more females than males survive to this age.

| | 1986 | 1996 |
|-------------|--------|--------|
| 0-4 | 13,916 | 13,479 |
| 5-14 | 24,526 | 24,779 |
| 15-24 | 21,341 | 19,617 |
| 25-34 | 11,156 | 13,675 |
| 35-44 | 7,961 | 8,808 |
| 45-54 | 6,818 | 6,808 |

| Not stated | 73 | - |
| TOTAL | 94,649 | 97,784 |

Table 6: Population by broad age group 1986 and 1996

The impact of net out-migration is highlighted in the comparison of broad age groups, from 1986 and 1996 Censuses, as set out in Table 6. The most striking feature in this table is the age group "15-24" with 21,341 persons in 1986. Ten years later, this group of people fall into the "25-34" group but the number of persons has dropped dramatically to 13,675. Although direct comparisons between different cohorts are influenced to some extent by different birth and death rates, net out-migration is clearly a major explanation of the differences between the two census periods.

All these influences can be seen in Fig. 3 below, often referred to as a **population pyramid** because of its pyramid-like shape. The wide base represents the recent births into the population. The narrowing of the structure as one moves up the age structure, largely shows the effects of mortality as well as age and sex, sex ratios at birth, changing birth rates and selective migration.

The most appropriate measure of central tendency for an age distribution is the median age which describes the age that divides the whole population into two equal sizes, with one half younger and the other half older than the median age. Populations with medians under 20 may be described as a "young population"; those with medians between 20 to

29 may be described as an "intermediate population", and those with medians of 30 and over as an "old population". When the median age rises, the population may be said to be "aging" and when it falls, the population may be said to be "younging".

| | 1986 | 1996 |
|-------------------|--------|--------|
| | Census | Census |
| Less than 5 | 13,916 | 13,479 |

| MEDIAN AGE | 18.6 | 19.9 |

 Table 7: Population by age group and median age, 1986 and 1996

The population of Tonga is categorized as a young population with a median age of 19.9 years, an increase from 18.6 in 1986 census (see Table 7).

2.2 SOCIAL PROFILE OF THE POPULATION

2.2.1 MARRIAGE

Marriage is near universal in Tonga with about 94% of all people marrying by age 50 in 1996. All marriages in Tonga are formally celebrated by the State and the Church. The legal age for marriage is 18 years but persons younger than 18 years can be married with parental consent.

A Single question was asked to identify the marital status of all persons. Four options were given: never married, married, widowed, or separated/divorced.

Never married referred to persons who were not or never been married

<u>Married</u> referred to persons who were presently married during the census night and lived together with their spouses. The census did not intend to find out who was/was not legally married. Information was self reported.

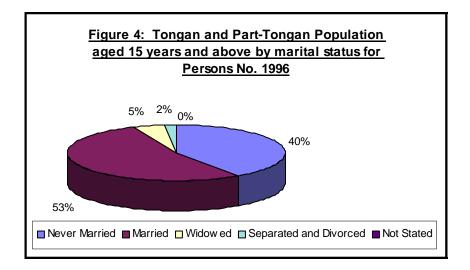

Widowed referred to a person who was married but the spouse has passed away.

<u>Separated/Divorced</u> referred to a person who has been married, but during census night he/she was divorced or separated either legally or by custom.

| | Male | e Female Persons | | Persons | | |
|---------------------|--------|------------------|--------|---------|--------|-------|
| Marital Status | No. | % | No | % | No | % |
| Never Married | 12,722 | 44.1 | 10,652 | 36.4 | 23,374 | 40.2 |
| Married | 15,008 | 52.1 | 16,011 | 54.7 | 31,019 | 53.4 |
| Widowed | 716 | 2.5 | 2,049 | 7.0 | 2,765 | 4.8 |
| Separated /Divorced | 374 | 1.3 | 572 | 2.0 | 946 | 1.6 |
| Not Stated | 2 | 0.0 | - | - | 2 | 0.0 |
| TOTAL | 28,822 | 100.0 | 29,284 | 100.0 | 58,106 | 100.0 |

Table 8: Tongan and Part-Tongan Population aged 15 years and above
by marital status and sex, 1996.

Table 8 shows that a majority of persons aged 15 years and above or 53.4 percent were married. The high proportion of never married (40.2 percent) indicates that more Tongans are getting married at later ages. Only a small proportion were widowed (4.8 percent) or divorced (1.6 percent). This is clearly illustrated in Figure 4.

Females tend to live longer than males and this is true in Tonga which recorded only 716 widowed males compared to 2,049 widowed females in 1996.

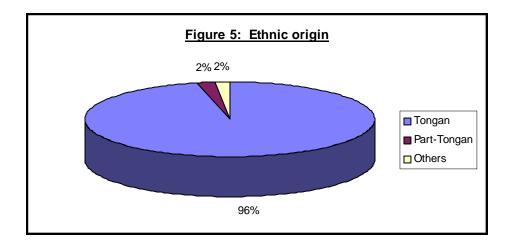

2.2.2 ETHNICITY

The ethnicity question related to the ethnic group that a person belonged in 1996 (i.e the ancestry with which he/she identified). The 1996 Census recorded 98.2 percent Tongans and Part-Tongans and only 1.8 percent shared by other ethnic groups.

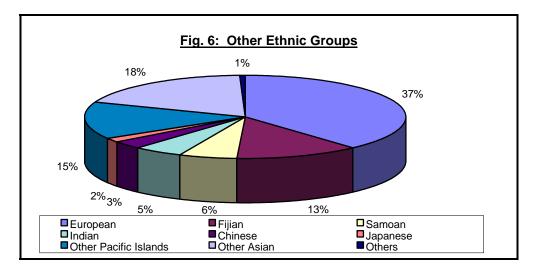

| Ethnicity | Male | Female | Total |
|-------------------------|--------|--------|--------|
| Tongan | 47,797 | 46,491 | 94,288 |
| Part-Tongan | 866 | 866 | 1,732 |
| European | 383 | 293 | 676 |
| Fijian | 122 | 101 | 223 |
| Samoan | 41 | 62 | 103 |
| Indian | 43 | 42 | 85 |
| Chinese | 34 | 21 | 55 |
| Japanese | 19 | 10 | 29 |
| Other Pacific Islands | 128 | 128 | 256 |
| Other Asian | 176 | 149 | 325 |
| Not Elsewhere Specified | 6 | 6 | 12 |
| TOTAL | 49,615 | 48,169 | 97,784 |

 Table 9: Total Population by Ethnicity and Sex, 1996

The distribution of the total population by ethnic group is given in Table 9 and clearly illustrated in Figure 5.

The majority of Non-Tongans were Europeans (38.3 percent) followed by Pacific Islanders and Asians which has increased significantly since the 1986 Census. These Europeans were mainly expatriates and their families, and tourists. The number of Chinese is gradually increasing in numbers, as well as the number of Indians and Fijians.

2.2.3 RELIGION

The 1996 Census indicated that the Free Wesleyan Church was still the main Christian denomination with 39,703 members or 41.3 percent of the total Tongan population. Almost 16 percent belonged to the Roman Catholic Church, 13.8 percent belonged to the Latter Day Saints, 11.7 percent belonged to the Free Church of Tonga, 7.3 percent belonged to the Church of Tonga, 3 percent belonged to the Tokaikolo Church , 2.5 percent belonged to the Seven Days Adventist Church, 1.1 percent belonged to the Assemblies of God, 0.8 percent belonged to the Anglican Church, and the rest of the Christian denominations and other religions shared the remaining 2.5 percent. Only 61 Tongans indicated they had no religion and 10 refused to give an answer. The question on religion was the only optional question in the Census where people were given the option of answering or not answering

this question. Table 10 gives a comparison of the number of Tongans and part-Tongans belonging to each religion in the Censuses of 1986 and 1996.

| | 1986 | | 199 | 6 | |
|----------------------|---------|-------|---------|-------|---------------------|
| | Persons | | Persons | | Percentage |
| Religion | No | % | No | % | Change 86/96 |
| Free Wesleyan Church | 40,371 | 43.4 | 39,703 | 41.3 | -1.7 |
| Roman Catholic | 14,921 | 16.0 | 15,309 | 15.9 | 2.6 |
| Latter Day Saints | 11,270 | 12.1 | 13,225 | 13.8 | 17.3 |
| Free Church of Tonga | 10,413 | 11.2 | 11,226 | 11.7 | 7.8 |
| Church of Tonga | 6,882 | 7.4 | 7,016 | 7.3 | 1.9 |
| Tokaikolo Church | 3,047 | 3.3 | 2,919 | 3.0 | -4.2 |
| Seven Days Adventist | 2,143 | 2.3 | 2,381 | 2.5 | 11.1 |
| Assembly of God | 565 | 0.6 | 1,082 | 1.1 | 91.5 |
| Anglican Church | 563 | 0.6 | 720 | 0.8 | 27.9 |
| Others | 2874 | 3.1 | 2368 | 2.5 | -17.6 |
| No Religion | n.a. | | 61 | 0.1 | n.a. |
| Refused to answer | n.a. | | 10 | 0.0 | n.a. |
| TOTAL | 93,049 | 100.0 | 96,020 | 100.0 | 3.2 |

Table 10: Tongan and Part-Tongan Population by Religion, 1986 and 1996

(*Note: n.a.* = *not available*)

Although the Free Wesleyan Church of Tonga was the main Christian denomination in 1996, it showed a decrease in numbers from the 1986 count by 1.7 percent. The Tokaikolo Church and other small churches showed decreases in numbers when compared to the 1986 count. All other churches showed increases in membership since the 1986 Census with the Assemblies of God increasing the most by 91.5 percent, the Anglican Church increased by 27.9 percent, the Latter Day Saints increased by 17.3 percent, the Seven Days Adventist Church increased by 11.1 percent and details of increases in other Churches are given in Table 10.

The membership of Tongans and Part-Tongans in the various Christian denominations is illustrated in Figure 7.

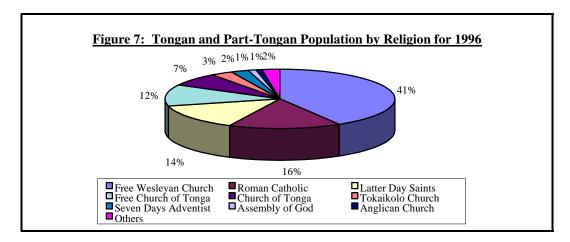

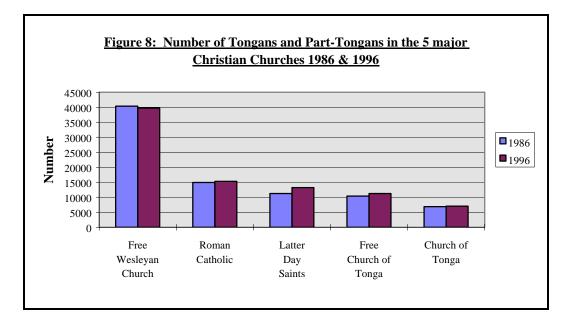

Figure 8 illustrates the number of Tongans and part-Tongans in each of the five major Christian churches in the Censuses of 1986 and 1996.

2.2.4 EDUCATION

Education in Tonga is compulsory for ages 6 to 14 and it is still a major sector which the Government of Tonga considers important in its current development planning. The 1996 Census asked four questions in order to capture general information on education, namely on current school attendance, highest level of education achieved, highest qualifications obtained and literacy.

The 1996 Census results indicates improved educational attainment since the 1986 Census, with more persons going onto secondary and tertiary education or 64.0 percent in 1996 compared to 57.3 percent in 1986, as well as a reduction in the number of persons without any form of education. The proportion of students going onto secondary level education increased from 55.8 percent in 1986 to 60.4 percent in 1996 and the proportion of students going on to tertiary education increased from 1.5 percent to 3.6 percent in 1996.

| | 1986 | | 1990 | 6 | |
|-------------------|---------|-------|---------|-------|---------------------|
| | Persons | | Persons | | Percentage |
| Educational Level | No | % | No | % | Change 86/96 |
| No schooling | 2,371 | 3.2 | 1,685 | 2.0 | -28.9 |
| Primary | 28,924 | 39.5 | 28,057 | 34.0 | -3.0 |
| Secondary | 40,889 | 55.8 | 49,925 | 60.4 | 22.1 |
| Tertiary | 1,083 | 1.5 | 2,998 | 3.6 | 176.8 |
| TOTAL | 73,267 | 100.0 | 82,665 | 100.0 | 12.8 |

 Table 11: Distribution of Tongans and part-Tongans aged 5 years and above by level of educational attainment, 1986 and 1996

Figure 9 illustrates the distribution of Tongans and part-Tongans aged 5 years or more by highest level of education achieved by the broad levels of primary, secondary and tertiary.

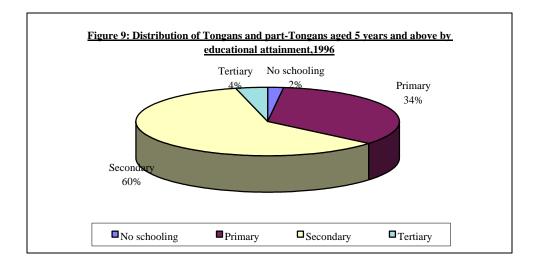

Table 12 gives the highest level of educational attainment for different age groups, with the numbers representing persons in each age group that have obtained specific levels of education. The younger age group of 25-34 years shows a majority or 49.1 percent having attained Forms 4 or 5 in Secondary school, compared to 38.7 percent in the 35-49 age group and only 24.5 percent in the 50 years and above. Those aged 50 years and above had a majority or 48.4 percent attaining only Primary education. Most persons who had achieved tertiary education were aged between 35-49 years, and most persons who had achieved Forms 6 or 7 were aged between 25-34 years.

| | · | | | % Distribution | | |
|-----------------------|--------|--------|------------------------|----------------|-------|------------------------|
| Level attained | 25-34 | 35-49 | 50 ⁺ | 25-34 | 35-49 | 50 ⁺ |
| Primary only | 1,217 | 2,461 | 6,570 | 9.1 | 20.8 | 48.4 |
| Secondary: Form 1 - 3 | 2,652 | 2,958 | 2,746 | 19.9 | 25.0 | 20.3 |
| Secondary: Form 4 - 5 | 6,547 | 4,578 | 3,324 | 49.1 | 38.7 | 24.5 |
| Secondary: Form 6 - 7 | 1,916 | 762 | 437 | 14.4 | 6.4 | 3.2 |
| Tertiary | 995 | 1,070 | 485 | 7.5 | 9.1 | 3.6 |
| TOTAL | 13,327 | 11,829 | 13,562 | 100.0 | 100.0 | 100.0 |

 Table 12: Distribution of Tongans and part-Tongans by level of educational attainment and age group, 1996

Table 13 gives a comparison of educational attainment for males and females in each age group. For persons aged 50 years and above, 52.3 percent of females attained primary education only compared to 44.4 percent of males. In ages 25-49, a higher proportion of females attained secondary level than males, but tertiary education was dominated by males in all age groups.

| | | Male | | | Female | | | |
|-------------------|-------|-------|------------------------|-------|--------|------------------------|--|--|
| Educational Level | 25-34 | 35-49 | 50 ⁺ | 25-34 | 35-49 | 50 ⁺ | | |
| Primary | 10.0 | 19.8 | 44.4 | 8.3 | 21.7 | 52.3 | | |
| Secondary | 81.9 | 68.8 | 50.5 | 84.9 | 71.3 | 45.6 | | |
| Tertiary | 8.1 | 11.4 | 5.1 | 6.8 | 7.0 | 2.1 | | |
| TOTAL | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | | |

 Table 13: Percentage distribution of Tongans and part-Tongans by level of educational attainment, age group and sex, 1996

Table 14 gives the participation rates at school for age groups between ages 6-24 years. As expected, almost all those aged 6-14 were attending school, with slightly higher participation rates for females than males. In the age group 15-19 years, more females attended school or 70.7 percent compared to only 64.4 percent of males. There were however more males than females attending school in ages 20-24 indicating that more males were engaged in tertiary education than females.

 Table 14:
 School Attendance and participation rates by age group and sex,1996

| | Male | • | | Female | | |
|-----------|-----------|-----------|------------|-----------|-----------|------------|
| Age group | Attending | Not | Part. Rate | Attending | Not | Part. Rate |
| | | Attending | | | Attending | |
| 6-9 | 5,066 | 129 | 97.5 | 4,381 | 104 | 97.7 |
| 10-14 | 6,137 | 295 | 95.4 | 5,783 | 197 | 96.7 |
| 15-19 | 3,576 | 1,981 | 64.4 | 3,700 | 1,536 | 70.7 |
| 20-24 | 548 | 3,833 | 12.5 | 469 | 3,745 | 11.1 |
| TOTAL | 15,327 | 6,238 | 71.1 | 14,333 | 5,582 | 72.0 |

The 1996 Census recorded the highest qualifications obtained by the population aged 11 years and over. The results for Tongans and part-Tongans showed that 406 obtained an undergraduate Certificate, 1634 obtained an undergraduate Diploma, 786 obtained a first Degree, 28 obtained a post-graduate Certificate or Diploma, 118 obtained a Masters Degree, and 25 obtained a PhD. Table 14 shows the distribution of these qualifications by broad age group. Most Tongans or part-Tongans with Diplomas were aged 20-29 years; majority with first Degrees were aged 20-39 years; majority with a Masters Degree were aged 30-39 years; and majority with a PhD were aged 50 years and above.

| Qualifications/Age | 11-19 | 20-29 | 30-39 | 40-49 | 50+ | Total |

| PhD | 19 | 6 | 25 |
| Others | 8 | 1 | 9 |
| TOTAL | 33,940 | 34,031 | 67,971 |

Table 16: Highest Qualifications obtained for Tongans and part-Tongansaged 11 years and above by gender, 1996

The distribution of those in each level of qualifications obtained, into the 5 island Divisions is given in Table 17. Since 68.5 percent of the population lived on Tongatapu, it is expected that the majority in each level of qualifications resided in Tongatapu. For example, 88 percent of those with a first Degree, 96 percent of those with post-graduate

Certificates of Diplomas, 91 percent of those with Masters Degrees and 84 percent of those with PhD's lived in Tongatapu. It is interesting to note that other divisions like Vava'u, Ha'apai and Niua had people with Masters Degrees, and Vava'u and Ha'apai divisions had a share of graduates with PhD's.

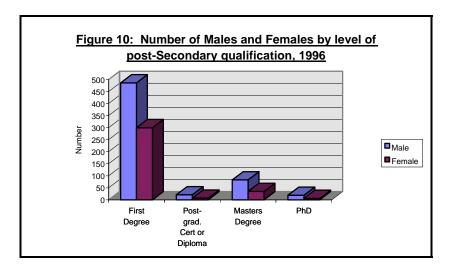

Figure 10 gives a graphical representation of the distribution by gender of the various levels of post-Secondary qualifications.

| Qualifications/Division | Tonga | Tongatapu | Vava'u | Ha'apai | 'Eua | Niua |
|----------------------------|--------|-----------|--------|---------|-------|-------|
| No qualification | 10,243 | 5,475 | 2,757 | 917 | 599 | 495 |
| Primary School | 38,295 | 26,182 | 5,645 | 3,614 | 2,243 | 611 |
| Some Secondary | 1,001 | 713 | 162 | 66 | 37 | 23 |

 Table 17: Distribution of levels of qualifications by island Division, 1996

2.2.5 LITERACY

The 1996 Census recorded 98.5 percent of Tongans and Part-Tongans aged 6 years and above as literate either in Tongan or English or both languages and only 1.5 percent were illiterate. The majority of Tongans and Part-Tongans or 72.8 percent could read and write both in English and Tongan, 25.2 percent could read and write in the Tongan language

only, and 0.6 percent were literate in English only. The remaining 1.5 percent could neither read nor write in Tongan or English. For a person to be considered as literate in a language, that person must be able to read and write in that language.

| | Male | % | Female | % | Persons | |
|--------------------|--------|-------|--------|-------------|---------|-------|
| | No | | No | | No | % |
| Literate: | 39,794 | 98.4 | 39,224 | 98.7 | 49,018 | 98.5 |
| English and Tongan | 29,335 | 72.5 | 29,076 | 73.1 | 58,411 | 72.8 |
| English only | 225 | 0.6 | 249 | 0.6 | 474 | 0.6 |
| Tongan only | 10,234 | 25.3 | 9,899 | 24.9 | 20,133 | 25.1 |
| Illiterate | 650 | 1.6 | 523 | 1.3 | 1,173 | 1.5 |
| Not reported | 5 | 0.0 | 2 | 0.0 | 7 | 0.0 |
| TOTAL | 40,449 | 100.0 | 39,749 | 100.0 | 80,198 | 100.0 |

 Table 18: Literacy of Tongans and Part-Tongans aged 6 years and above by language and by sex, 1996

There were no significant differences in the literacy rates for males and females as indicated in Table 18. The literacy rate for males was 98.4 percent compared to 98.7 percent for females. There were slightly more males than females that were literate in both Tongan and English, and slightly more females than males literate in English only, and more males than females literate in Tongan only.

Table 19: Literacy of Tongans and Part-Tongans aged 6 years and above
by language and broad age group, 1996

| Age group | Total | English and Tongan | English only | Tongan only | Illiterate | Not Stated |
|-----------|--------|--------------------------|-----------------|----------------|------------|---------------|
| 6-9 | 9,680 | 3,574 | 174 | 5,466 | 464 | 2 |
| 10-14 | 12,412 | 11,062 | 78 | 1,202 | 69 | 1 |
| 15-19 | 10,793 | 9,969 | 43 | 721 | 58 | 2 |
| 20-24 | 8,595 | 7,740 | 16 | 759 | 79 | 1 |
| 25-34 | 13,327 | 11,400 | 28 | 1,791 | 107 | 1 |
| 35-49 | 11,829 | 8,519 | 41 | 3,139 | 130 | 0 |
| 50+ | 13,562 | 6,147 | 94 | 7,055 | 266 | 0 |
| Total | 80,198 | 58,411 | 474 | 20,133 | 1,173 | 7 |

The age distribution of literate persons indicate a majority of those literate in English and Tongan in ages 25-34 and 10-14. A majority of those literate in English only were in ages 9 years or less, or 50 years and above. A similar pattern is followed by those literate in Tongan only, with a majority in the very old and very young ages. Those that were illiterate were also amongst the very young and very old.

2.3 ECONOMIC ACTIVITY

2.3.1 Economically Active population

A number of questions were asked in the Census of 1996 to capture the economic activity of persons aged 15 years and above during the reference period (7 days before Census enumeration). Economic activity generally looked at the main activity that each person was engaged during the reference week. If there were more than one activity, the activity on which most time was spent during the reference period was included. Economically active persons were those who were identified as employed, unemployed or temporarily absent from work. Economic activity referred to any activity that could be valued in monetary terms irrespective of whether any payment in cash or in kind was received.

<u>The employed population</u> looked at those who were aged 15 years and above and were engaged in some economic activity during the week preceding the census period irrespective of hours worked.

<u>The unemployed population</u> included those aged 15 years and above, not engaged in any economic activity, who were still seeking work/job or available to be employed.

<u>The temporary absent from work</u> population were those who were in the employed population but during the reference period (week preceding the census period) were absent due to illness, on leave, industrial dispute, bad weather or other personal reasons.

<u>The not economically active</u> population consisted of those aged 15 years and above that were not involved in any economic activity during the reference period, which included those engaged in housework only, students, the old/retired and handicapped/disabled.

The analysis on economic activity refers only to the Tongan and Part-Tongan population aged 15 years and above.

The 1996 census results showed that 58.4 percent of those aged 15 years and above were economically active while 41.6 percent were not economically active. In 1986, 43.5 percent were economically active while 56.5 percent were not economically active. The 58.4 percent that were economically active is often referred to as the Labour Force Participation Rate. Out of those that were economically active, 50.7 percent were employed and 7.7 percent were unemployed, compared to 39.6 percent and 3.9 percent in 1986. The number of unemployed persons increased from 2,141 in 1986 to 4.502 in 1996, and the unemployment rate (i.e. the number of unemployed as a percent of the total economically active population) was 13.3 percent in 1996 which was much higher than the 9.0 percent in 1986. Distribution of the 15 years and above population by economic activity status is given in Table 20.

| Economics Activity Status | 1986 | | 1996 | % |
|----------------------------------|--------|-------|--------|-------|
| | No | % | No | |
| Economically active | 23,745 | 43.5 | 33,908 | 58.4 |
| Employed | 21,604 | 39.6 | 29,406 | 50.7 |
| Unemployed | 2,141 | 3.9 | 4,502 | 7.7 |
| Not economically active | 30,852 | 56.5 | 24,194 | 41.6 |
| TOTAL | 54,597 | 100.0 | 58,102 | 100.0 |

Table 20: Distribution of population aged 15 years and above
by economic activity status, 1986 and 1996.

2.3.2 Non-economically active population

The non-economically active population consisted of those that were not involved in any economic activity during the reference period and comprised those who were engaged in housework only, students, old or retired persons and the disabled.

| Table 21: Distribution of population aged 15 and above by non-economic activity status, |
|---|
| 1986 and 1996 |

| Activity Status | 1986 | | 1996 | % |
|-----------------|--------|-------|--------|-------|
| | No | % | No | |
| Housework | 15,933 | 51.6 | 12,576 | 52.0 |
| Student | 8,871 | 28.8 | 8,403 | 34.7 |
| Disabled | 409 | 1.3 | 545 | 2.3 |
| Other | 5,639 | 18.3 | 2,670 | 11.0 |
| TOTAL | 30,852 | 100.0 | 24,194 | 100.0 |

The majority of persons involved in non-economic activities were doing housework only during the reference period with about 52 percent, followed by those who claimed that they were full time students with 34.7 percent. Only 28.8 percent were recorded as students in 1986. The number of disabled persons has increased since 1986, but those who were in the 'Others' category decreased from the 1986 figure of 5,639 to only 2,670.

Table 22: Non-economically active population aged 15 years and above
by age group and sex, 1996

| | | Male | | | | Female | | |
|-------|-----------|---------|----------|--------|-----------|---------|----------|--------|
| | Housework | Student | Disabled | Others | Housework | Student | Disabled | Others |
| | only | | | | only | | | |
| 15-19 | 168 | 3,546 | 30 | 14 | 779 | 3,696 | 26 | 4 |
| 20-24 | 221 | 518 | 45 | 32 | 1,644 | 463 | 40 | 4 |
| 25-34 | 294 | 106 | 64 | 30 | 2,927 | 32 | 50 | 4 |
| 35-49 | 242 | 22 | 66 | 35 | 2,821 | 11 | 56 | 21 |
| 50+ | 339 | 5 | 94 | 1,252 | 3,141 | 4 | 74 | 1,274 |
| TOTAL | 1,264 | 4,197 | 299 | 1,363 | 11,312 | 4,206 | 246 | 1,307 |

There was a significant difference by gender and age group in the non economically active population. More than 80 percent of those in age group 15 to 19 for both sexes

were identified as full time students which was as expected. A significant difference is clearly shown in those engaged in housework only with females dominating with 11,312 compared to only 1,264 males. There were slightly more disabled males than females, and the "Others" category, consisting mainly of retired or old people, showed no significant differences by gender. In 1986, 15,697 females were engaged in home duties or housework only compared to only 236 males and there were slightly more male students than females.

2.3.3 Employed population

2.3.3.1 Employed population by main economic activity

The 1996 Census counted 29,406 Tongans and part-Tongans aged 15 years and above that were employed, with almost 63 percent males and 37 percent females. This figure was 21,604 in 1986, with 17,558 males (81 percent) and only 4,046 (19 percent) females. The employed population consisted of those who were engaged in paid employment, i.e. a full time job or part-time job; engaged in farming, fishing or making handicrafts; and those who were temporarily absent from work on vacation, illness, or any other reasons during the reference period.

In 1996, more than half or 54.4 percent of the employed population were engaged either in agriculture, fishing or making handicrafts, compared to 45 percent in 1986; 45.3 percent were engaged in paid employment compared to 41.9 percent in 1986, and 0.3 percent were temporarily on leave from work compared to 0.5 percent in 1986. There were 8,597 males in paid employment compared to 7,365 in 1986, 4,721 females in paid employment compared to 3,423 in 1986, and 9,749 males engaged in farming, fishing or handicraft making compared to 9,421 in 1986, and 6,262, females engaged in farming, fishing or handicraft making compared to only 89 in 1986. Some caution should be made in making direct comparisons of the 1996 and 1986 census results since the making of handicrafts was not included with farming and fishing in 1986.

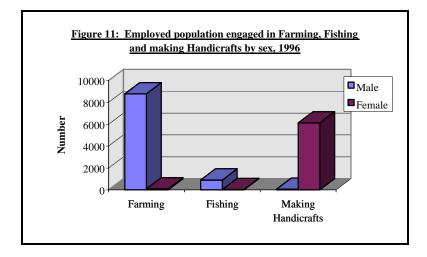

| | Male | | Female | | Persons | |
|-------------------------------|--------|-------|--------|-------|---------|-------|
| Economic Activity | No | % | No. | % | No. | % |
| Paid employment | 8,597 | 46.7 | 4,721 | 42.9 | 13,318 | 45.3 |
| Farming, Fishing, handicrafts | 9,749 | 53.0 | 6,262 | 56.9 | 16,011 | 54.4 |
| On Leave | 56 | 0.3 | 21 | 0.2 | 77 | 0.3 |
| TOTAL | 18,402 | 100.0 | 11,004 | 100.0 | 29,406 | 100.0 |

More than half or 58.5 percent of those employed in agriculture or farming produced for their own use, 34.5 percent occasionally sold produce and only 7 percent regularly sold produce. The majority of those engaged in fishing occasionally sold their catch, and almost 58 percent of those engaged in making handicrafts produced for their own use, 36 percent occasionally sold and 6 percent regularly sold their handicrafts.

Table 24: Employed population engaged in Farming, Fishing and making Handicrafts by purpose of produce, 1996

| Farming, etc. | Own Use | Occasionally Sell | Regularly Sell | Total |
|--------------------|---------|----------------------|-------------------|-------|
| Farming | 5,188 | 3,063 | 619 | 8,870 |
| Fishing | 254 | 448 | 238 | 940 |
| Making Handicrafts | 3,579 | 2,247 | 364 | 6,190 |
| Others | 3 | 3 | 5 | 11 |

Farming and fishing were dominated by males while making handicrafts was dominated by females. This is clearly illustrated in Figure 11.

Centralised economic and social development in Nuku'alofa has encouraged urban drift in population to Nuku'alofa. Greater Nuku'alofa comprises of Kolomotu'a and Kolofo'ou Districts. Since the capital, Nuku'alofa is located on the main island of Tongatapu, most employed persons in Greater Nuku'alofa were in paid jobs. Almost 79 percent of the employed population in the Greater Nuku'alofa area were in paid employment compared to only 32.5 percent of the employed located elsewhere in Tonga. Over 67 percent of the employed population engaged in farming, fishing and making handicrafts were located elsewhere in Tonga and only 20.7 percent were located in Greater Nuku'alofa.

Table 25: Distribution of employed population by main activity,Greater Nuku'alofa and Rest of Tonga, 1996

| | Grea | ter | | | | |
|----------------------------|--------------------|-------|----------------------|-------|---------|-------|
| | Nuku'alofa No % | | Rest of Tonga | | Persons | |
| | | | No. | % | No. | % |
| Paid employment | 6,409 | 78.8 | 6,909 | 32.5 | 13,318 | 45.3 |
| Farm, Fishing & handicraft | 1,679 | 20.7 | 14,332 | 67.3 | 16,011 | 54.4 |
| On Leave | 41 | 0.5 | 36 | 0.2 | 77 | 0.3 |
| TOTAL | 8,129 | 100.0 | 21,277 | 100.0 | 29,406 | 100.0 |

2.3.3.2 Employed Population by employment status

The majority of the employed population in 1996 or 31.1 percent worked in a family business with no payment, 25.9 percent worked on their own account with no helpers,

17.7 percent were government employees, and 19 percent were private employees. A similar pattern was shown for both males and females. Table 26 indicates that males dominated all categories of employment status in numbers for example, out of a total of 149 employers, 117 were males and only 32 were females.

| | Male | | Female | | Persons | |
|----------------------|--------|-------|--------|-------|---------|-------|
| Employment Status | No | % | No | % | No | % |
| Own Account | 4,799 | 26.1 | 2,804 | 25.5 | 7,603 | 25.9 |
| Employer | 117 | 0.6 | 32 | 0.3 | 149 | 0.5 |
| Gov't Employee | 3,322 | 18.1 | 1,887 | 17.1 | 5,209 | 17.7 |
| Quasi-Gov't Employee | 1,060 | 5.8 | 562 | 5.1 | 1,622 | 5.5 |
| Private Employee | 3,615 | 19.6 | 1,978 | 18.0 | 5,593 | 19.0 |
| Unpaid family worker | 5,460 | 29.7 | 3,699 | 33.6 | 9,159 | 31.1 |
| Other | 29 | 0.2 | 42 | 0.4 | 71 | 0.2 |
| TOTAL EMPLOYED | 18,402 | 100.0 | 11,004 | 100.0 | 29,406 | 100.0 |

 Table 26: Distribution of the employed population by employment status and sex, 1996

2.3.3.3 Employed Population by occupation

In the 1986 census, occupations of the employed population were classified according to the International Standard Classification of Occupations 1968 (ISCO-68) but the 1996 census used the upgraded ISCO-88 (see Table 26). ISCO-68 combined Professionals and Technicians which was equal to 2,622, and Craft and Related Trade Workers were combined with Plant & Machine Operators and Assemblers, Elementary Occupations, and those in the Armed Force, which came to 4,321 in 1986.

Table 27: Employed population by main occupation, 1986 and 1996

| | 1986 | 1986 | | 6 |
|------------------------------------|--------|------|--------|-------|
| Occupation | No | % | No | % |
| Legislators, Managers, etc | 268 | 1.3 | 536 | 1.8 |
| Professionals | 2,622 | 12.1 | 2,136 | 7.3 |
| Technicians | | | 1,928 | 6.6 |
| Clerks | 2,078 | 9.6 | 2,278 | 7.8 |
| Service Workers | 2,264 | 10.5 | 1,925 | 6.5 |
| Skilled Agric. & Fisheries Workers | 10,051 | 46.5 | 9,945 | 33.8 |
| Craft & Related Trade Workers | 4,321 | 20.0 | 8,040 | 27.3 |
| Plant & Machine Operators | | | 1,037 | 3.5 |
| Elementary Occupations | | | 1,581 | 5.4 |
| TOTAL | 21,604 | | 29,406 | 100.0 |

Some caution should be taken when making direct comparisons of occupations from the 1986 and 1996 Censuses, due to the change in classifications.

Most of the employed population in 1996 or 33.8 percent were employed in agriculture and fisheries compared to 46.5 percent in 1986. There was a significant increase in those

engaged in Craft and related Works from 20 percent in 1986 to 27.3 percent in 1996. In 1996, 7.8 percent were clerks, and 7.3 percent were professionals.

There is a significant move by employed Tongans from occupations in agriculture and fishing which had a big fall of 12.7 percentage points to Craft and Related Trades workers which has increased significantly from 20 percent in 1986 to 27.3 percent in 1996. This is mainly a consequence of the inclusion in 1996 of women engaged in own account making of handicrafts at home in this category. A drop is also seen in Clerical jobs and it is assumed that the impact of computers has affected this category since computer operators are classified as Technicians and Associated Professionals, resulting in fewer clerical posts.

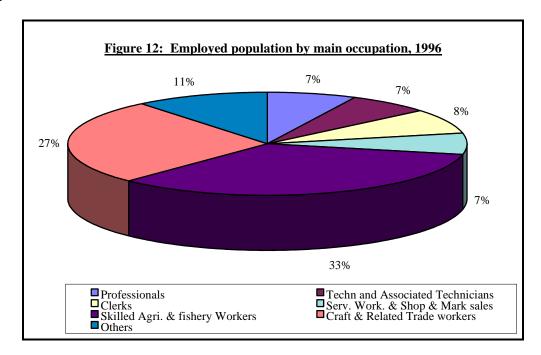

Figure 12 gives a clear picture of the distribution of the employed population by occupations.

Table 28 shows that Legislators, Senior Officials and Managers, for which higher qualifications and many years of work experience are required occur mostly in the 35 years and above. Clerical work requires only secondary school level of qualification, and it is therefore dominated by the young or 20-34 age group. For agricultural work, the dominant occupation, there are no age limitations or qualifications needed. Hence 55.1 percent of those aged 15 - 19 years were engaged in agriculture and fishing, consisting mainly of young school leavers who were unable to find jobs elsewhere and therefore engage in agricultural work. Craft and Related trade workers are dominated by the 35 years and above, and most technicians were aged between 25-49 years. Most of those employed in elementary occupations were aged 20-34 years.

Table 28: Percentage distribution of the employed populationby main occupation and broad age group, 1996

| Main Occupation | 15-19 | 20-24 | 25-34 | 35-49 | 50+ |
|------------------------------------|-------|-------|-------|-------|-------|
| Legislators, Managers, etc | 0.1 | 0.2 | 1.0 | 2.9 | 3.0 |
| Professionals | 1.1 | 4.7 | 8.1 | 9.5 | 6.4 |
| Technicians etc. | 1.2 | 6.5 | 8.2 | 8.6 | 3.2 |
| Clerks | 4.5 | 14.1 | 12.7 | 5.4 | 1.0 |
| Service Workers etc. | 8.9 | 11.2 | 8.1 | 5.3 | 2.7 |
| Skilled Agric. & Fisheries Workers | 55.1 | 32.6 | 28.2 | 28.1 | 43.9 |
| Craft & Related Trade Workers | 22.4 | 21.4 | 23.3 | 31.1 | 32.8 |
| Plant & Machine Operators etc. | 1.2 | 3.0 | 4.7 | 4.2 | 2.0 |
| Elementary Occupations | 5.4 | 6.4 | 5.7 | 4.9 | 4.9 |
| TOTAL | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

Most employed males or 53.5 percent worked in agriculture or fisheries and 9.6 percent of employed males were in craft and related works. More than half of the employed females or 57 percent were in craft and related works showing Tongan women engaged in making tapa or handicrafts at home while doing housework. Over 13 percent were clerks and 9.3 percent were service workers. There were many more male Professionals than females, as well as more male Technicians & Associated Technicians than females. Details of the types of occupations held by gender is given in Table 29.

Table 29: Employed population by main occupation by sex, 1996

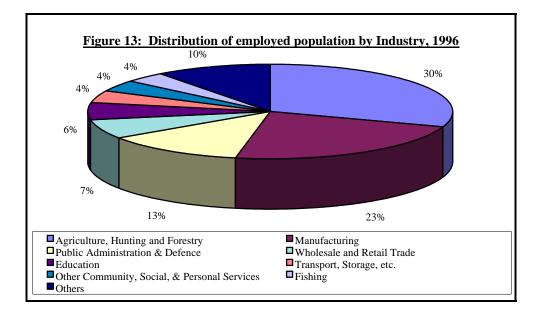

| | Male | | Female | | |
|------------------------------------|--------|-------|--------|-------|--|
| Occupation | No | % | No | % | |
| Legislators, Managers, etc | 434 | 2.4 | 102 | 0.9 | |
| Professionals | 1,256 | 6.8 | 880 | 8.0 | |
| Technicians | 1,020 | 5.5 | 908 | 8.3 | |

| Skilled Agric. & Fisheries Workers | 9,848 | 53.5 | 97 | 0.9 | |
| Craft & Related Trade Workers | 1,766 | 9.6 | 6,274 | 57.0 | |
| Plant & Machine Operators | 1,000 | 5.4 | 37 | 0.3 | |
| Elementary Occupations | 1,334 | 7.2 | 247 | 2.3 | |
| TOTAL | 18,402 | 100.0 | 11,004 | 100.0 | |

2.3.3.4 Employed population by industry

Information on the types of industries people were employed in was collected in the Censuses of 1986 and 1996. These industries were classified according to the International Standard Industrial Classifications of 1990, often referred to as ISIC-90 in 1996 but ISIC-68 was used in 1986.

Census results showed that in 1996, most or 30.2 percent of those that were employed were employed in Agriculture and Forestry, 22.8 percent were employed in Manufacturing, 12.6 percent were employed in Public Administration and Defence and 6.7 percent were employed in Wholesale and Retail Trade.

The distribution of the employed population to each industry is clearly shown in Figure 13 below.

Almost half or 47.8 percent of all employed males were in Agriculture and Forestry industries, and 15 percent were in Public Administration and Defence. Most employed females were in Manufacturing consisting mainly of women making handicrafts at home, 8.8 percent were employed in Education, and 8.6 percent employed in Public Administration and Defence.

| Table 30: | Employed | population age | l 15 years and | l above by | Industry, 1996 |
|-----------|----------|----------------|----------------|------------|----------------|
|-----------|----------|----------------|----------------|------------|----------------|

| | Total | | Male | | Female | |
|--|--------|-------|--------|-------|--------|-------|
| Industry | No | % | No | % | No | % |
| Agriculture, Hunting and Forestry | 8,886 | 30.2 | 8,795 | 47.8 | 91 | 0.8 |

| TOTAL | 29,406 | 100.0 | 18,402 | 100.0 | 11,004 | 100.0 |

Some caution should be taken when comparing industries in the 1986 and 1996 censuses since the 1986 Census used ISIC-68 while the 1996 Census used ISIC-90. ISIC-68 combines Fishing with Agriculture and Forestry; and Hotel & Restaurants are combined with Wholesale & Retail Trade; Real Estate & Renting is combined with Financial Intermediation, and Public Administration & Defence is combined with Education, Health, and other Community, Social and Personal Services.

| TOTAL | 21,604 | 100.0 | 29,406 | 100.0 |

 Table 31: Distribution of Industry in which employed persons worked, 1986 and 1996

There was a significant shift in the economic base from agriculture to manufacturing, indicated by the drop in the percentage engaged in agriculture from 49.1 percent in 1986 to only 33.8 percent in 1996, and an increase in the share of Manufacturing from 2.7 percent in 1986 to 22.8 percent in 1996. Some women who did housework but also engaged in making handicrafts are included in the Manufacturing industry. Construction industry had a big decrease of 6.2% and this is a result of few construction companies closing down during the intercensal period. There were slight increases realized in other industries like Electricity, Gas and Water, Wholesale, Retail Trade; and Hotels and Restaurants.

2.3.4 Unemployed population

A person was classified as unemployed in the Census of 1996 if he/she indicated that during the reference week i.e. one week before Census enumeration, he/she was not working but seeking work. A total of 4,502 Tongans and part-Tongans aged 15 years and above indicated they were unemployed of which 3,293 were males and 1,209 were females. A total of 29,406 persons indicated they were employed. The sum of the employed and unemployed persons give the total economically active population which was 33,908 in 1996. The unemployment rate recorded in 1996 was 13.3 percent i.e. the number of unemployed as a percent of the total economically active population.

| Age group | Male | Female | Total |
|-----------------|------|--------|-------|
| 15-19 | 42.8 | 43.1 | 42.9 |
| 20-24 | 26.6 | 21.2 | 24.6 |
| 25-34 | 12.9 | 7.1 | 10.8 |
| 35-49 | 7.9 | 3.6 | 6.2 |
| 50 ⁺ | 7.3 | 3.4 | 6.0 |
| TOTAL | 15.2 | 9.9 | 13.3 |

Table 32: Unemployment rates (%) of persons aged 15 years and aboveby sex and age group, 1996

Table 32 gives a detailed breakdown of the unemployment rates for males and females by age group. Most unemployed persons were aged 15-19 years followed by the 20-24 year olds. There was a higher unemployment rate recorded for males than females in all age groups except the 15-19 years old. Unemployment is very often most heavy among the young people especially in ages 15 to 24, which has accounted for 54.9 of the total unemployed population (Table 31). The lower unemployment rates for women aged 25 and above indicates women who were engaged in making handicrafts or agricultural and fishing activities therefore classifying them as employed.

It is interesting to note the distribution of the unemployed population in the five divisions. About 78.4 percent of the total unemployed population resided in Tongatapu and 21.6 percent in the other four divisions. More than half of the total unemployed population in Tongatapu were enumerated in Greater Nuku'alofa (i.e Kolofo'ou and Kolomotu'a Districts).

About 78.4 percent of the total unemployed population resided in Tongatapu on Census 1996 night, 12.3 percent were in Vava'u and 9.3 percent were in the other three divisions of Ha'apai, 'Eua and Niua. Almost 43 percent of the total unemployed population were enumerated in Greater Nuku'alofa, as well as 42.6 percent of unemployed males and 43.6 percent of unemployed females.

Figure 14 gives a graphical representation of the percentages of unemployed persons in each Division.

CHAPTER 3: DEFINITIONS AND NOTES

The <u>Census</u> counted all persons who were physically present within the Kingdom of Tonga and its territorial waters at midnight on Census night. The night of 30 November 1996 was declared as census night for the purpose of census taking and the Census related to the population at midnight on that date.

A <u>household</u> consists of persons who usually eat together and share the work of preparing the food and/or the cost of work of providing it. Generally household members live and sleep in the same building although this is not always the case hence the definition is based on eating together rather than on living or sleeping in the same building.

Members of each household were described according to their relationship with the <u>household head.</u> Each household was assigned a head during the enumeration. The head is usually named by the household members as being the person most responsible for their well-being.

A geographic distribution in the report provides information for the 5 Divisions and 23 Districts of the Kingdom of Tonga. More detailed information is available for islands, villages and census blocks. Figures for <u>Nuku'alofa</u> include the <u>villages</u> of Kolofo'ou, Ma'ufanga and Kolomotu'a. Figures for <u>Greater Nuku'alofa</u> include the <u>Districts</u> of Kolofo'ou and Kolomotu'a. The village of Neiafu in Vava'u Division is split into three separate villages namely Neiafu, Fungamisi and Falaleu.

The question on <u>place of birth</u> identified the village of birth in Tonga or elsewhere. In cases where the mother travelled to give birth, say in a hospital, the place where the mother usually lived was recorded.

The question on <u>place of usual residence</u> attempted to separate persons who usually lived in each household from those who were visiting temporarily. The distinction between being in residence and merely visiting is sometimes a difficult one to make, but in this case we should accept 6 months or more as "residence". If a person's place of usual residence is other than the household where he/she was enumerated, he/she was asked to indicate the name of the village and country where he/she usually lived. The length of time this person has lived in his/her usual place of residence was also asked in years and months.

The question on <u>educational attainment</u> relates only to the highest level of schooling <u>completed</u>. Only those aged 11 years and over were asked to indicate the highest qualification obtained. Those with post-Secondary qualifications were asked to indicate qualifications together with the field or major subjects.

The question on <u>literacy</u> was asked only of those aged 6 years and over. A person was considered <u>literate</u> in either English or Tongan if he/she is able to <u>read and write</u> in either language.

The questions on <u>Economic Activity</u> related to the main activity during the week preceding the census for all persons aged 15 years and over. If a person engaged in more than one activity, the activity on which most time was spent was specified.

The <u>Economically Active</u> population comprised those that were either engaged in a full or part time job or in a business, engaged mainly in farming, fishing or handicrafts making, or mainly in housework with some farming, fishing or making handicrafts, who had a job but was on leave or temporarily absent for some reason, and the unemployed.

The <u>employed</u> population included persons who stated that they had a full or part time job which they received pay, wages or salary; persons who worked without pay in a family business; persons who were primarily engaged in farming, fishing or making handicrafts for own use or for sale; engaged mainly in housework with some farming, fishing or making handicrafts for own use or for sale.

The <u>unemployed</u> population comprised those that were without work during the reference week and stated that they were looking for a job.

Persons who were neither employed nor unemployed were classified as <u>not economically</u> <u>active</u>. These included those engaged in housework only, full time students, the retired and the disabled.

All employed persons were asked further questions about the main work done during the reference week or their <u>principal occupation</u>. Occupations are classified in the tables according to the International Standard Classification of Occupations (ISCO) 1988. The 1986 Census used ISCO 1968.

<u>Industry</u> affiliation recorded the main activity undertaken by the establishment or place where the person worked. Industry affiliation were classified according to the International Standard Industry Classification (ISIC) 1990. The 1986 Census used ISIC 1968.

Employed persons were also classified according to the <u>status</u> of the principal occupation in which the person was employed during the reference week, whether the person operated his/her own farm or business or was engaged independently in a trade or profession without having any paid worker to assist him/her; or an employer who operated his/her own farm or business or was engaged independently in a profession or trade and employed one or more paid workers; an employee of government, quasi-Government or private firm or company, or an unpaid family worker.

Kingdom of Tonga

The National Population Census - 1996

Instructions regarding PRE-LISTING of HOUSEHOLDS

The purpose of this PRE-LISTING of HOUSEHOLDS for this Population Census is to establish a firm framework in which the rest of the Enumeration can be undertaken. It is a most important part of the Population Census and it is essential that this part be done as carefully as the rest of the Census Enumeration. A PRE-LISTING carefully done before the Census prevents later errors and confusion and makes the later stages of the Enumeration easier.

The steps are:

To establish the boundaries of your Census Block "on the ground" so that you know where the boundaries of your own Census Block and where neighbouring Census Blocks join yours.

To ensure that the map of your Census Block is up-to-date and correct as of the time of the Enumeration. You should make certain that all land covered within YOUR Census Block is included on YOUR map and are NOT included on the maps of enumerators of other Census Blocks. You will need to check with neighbouring enumerators to make sure that you all agree on where the boundaries of the Census Blocks are and that no intervening areas get left out.

To identify and assign a number to **every** <u>Household</u> within your Census Block, and locate, by number, these Households on your map.

To establish the <u>Name of the Head of Household</u> and prepare the listing of ALL Households, by number and by Name of Head of Household. You will use this list to check the progress and completeness of your Enumeration later on.

DEFINITIONS:

HOUSEHOLD The Household is the major grouping unit used in this Census. It is composed of the other major units of enumeration, the Individual. What, then, is a Household? It is defined here as **"Those persons who usually eat together and share the work of preparing the food and/or the cost or work of providing it."** Normally Household members also live and sleep in the same building but experience has shown that this is not always so , which is why the definition is based on <u>eating together</u> rather than on living or sleeping in the same building.

As an example, take a family consisting of a father, mother, and teenage unmarried son, an adult married son and his wife and two small daughters. If they share eating arrangements they should be enumerated as <u>one Household</u>. This would remain true even if the father works as a night watchman and does not sleep at home six nights a week, or if the teenage son often spends the night away who knows where. It also remains true if, for instance, on census night the men in the Household spend the night fishing and stay on a small island offshore in a temporary shelter and return home next morning.

If the adult son, his wife and two small daughters live in another house and maintain their own eating arrangements they are a separate Household - even if the houses are adjacent and the two families are on the closest possible terms. If the adult married son and his family live in another house but normally eat with the parents and the rest of the family, they remain ONE Household.

A Household may be found in a variety of forms. It may spread over more than one building. Members of a family may sleep in two or even more buildings but share one place to cook and eat. They should be enumerated as one Household. Two or more Households can be found in one building. Two or more families who share the same building but who do not normally prepare food and eat together should be enumerated as two Households, e.g. blocks of flats or servants who have their own quarters. Households may be found in

buildings intended primarily for other purposes. A family may live in the back of their shop for instance. Boats tied up to a dock or even pulled up on shore may be permanently lived in and be counted as Households. Enumerators should look out for such dwellings and enumerate their occupants as a Household if they meet the definition.

In doubtful cases, instead of grouping people into one Household who should perhaps be separated, it is better to use \underline{two} Households.

Some Households will be based in Institutions such as hotels, dormitories, prisons or military institutions. An <u>Institution</u>, for census purposes may be defined as an organisation providing specified services or performing some general function for a group of residents or inmates who will normally be unrelated to each other. In listing Households for these Institutions the common eating arrangement still applies, so that it is possible, for instance, that more than one Household will occur in the grounds of one Institution. Where a group of unrelated, institution-based persons have common eating arrangements, they should be treated as one Household and the Head of Household identified as the one who has administrative responsibility, supervises or, by common consent, seems to have some leadership authority.

THE PRE-LISTING PROCESS

You will be briefed on the boundary description of the Census Block assigned to you. Your Census block will be a Village, or if the Village is large, part of a Village, or some other grouping of people. Your map will have the boundaries of your Census Block (CB) shown on it. It is part of your job to relate this line to the features of you Census Block "on the ground". The map will show the boundary of your Census Block - All land and buildings contained within the boundaries should be covered in order to identify Households.

Begin identifying your Households with one easily recongnisable building, and start your numbering system and identification of the Head of the Household. This will have to be done by questioning, but at this stage you will not "interview" for more information than needed for the immediate Pre-listing. On this occasion you should take the opportunity of making yourself known as the appointed Enumerator of the Block, show evidence of your appointment, and explain briefly what you are doing. Inform each Head of Household that there will be a full scale enumeration of the village and that you will return later to do the enumeration of each Household in your Census Block.

In some cases, particularly if the Head of the Household and the adult women are likely to be away from the Household during the day, if they have paid jobs for instance, it may be wise to make an appointment at a set time to return to do the enumeration.

There will be a Publicity campaign preceding this phase of the Census, so that most persons will know about the enumeration but there are always some people who never get the word.

Locate each separate Household on your map, give it a number, and enter the full name of the Head of the Household against the number on the form PC1. You can work out your own system, remembering only that adjacent Households should have consecutive numbers and should start with the number 1.

It will be easier to identify a Household again, for personal interviews, if you mark roughly where it is on your map.

Kingdom of Tonga

The National Population Census - 1996

Enumerators' Instruction Manual

1. Introduction

1.1 **Purpose and Objectives of the Census**

A national population census has been taken in Tonga on a regular basis since 1921, although there were counts much earlier than this, going back at least to 1891 and probably earlier. Since World War II censuses have been taken in 1956, 1966, 1976 and 1986. The present census continues this series of decennial censuses.

Occasionally there is a special need for additional information and for this reason a mini census, with a limited range of questions was taken in 1984.

A national population census may be thought of as a "stock-taking" of the whole country, particularly of its most precious resource, its people. A great national effort is required to take a complete census successfully, and much time, energy and money must be devoted to it. For this reason it is most important that all the persons involved in the census give their best work to the project. Only a well-taken, accurate census meets the national need for essential information about the population.

A modern population census is not just a count of people. Information is needed on the structure of the population, for instance, the number of males and females and their ages, together with a variety of other characteristics related to their civil and economic status. Some questions, such as those about the children of females born before 1981 may seem useless to most people. These are used, employing statistical techniques and computers to estimate the forces which change a population, especially fertility and mortality. This is the only way measurement of these forces can be obtained as the registration of births and deaths in Tonga is far from complete. The questions asked on the Census Schedule have been carefully put together; none are unnecessary and it is essential that all be answered carefully and completely.

Other questions, such as those on education, migration, work and employment are used to measure the progress made over the last ten years in educating the population, in using their skills and developing the economy so that the quality of life in Tonga is improved and the national development objectives achieved.

Successful planning for the future needs of children for schools and trained teachers, of young adults for worthwhile employment and of older people for a rewarding retirement from hard work, is related to the availability of accurate information about the numbers and characteristics of theses groups, now and in the projected future.

1.2 Enumerators' Duties and Responsibilities

As an Enumerator, <u>you</u> have a most important role in the success of the National Population Census of 1996. The people of Tonga and their Government are relying on you to perform as conscientiously, accurately, efficiently and honestly as you are able. No census has ever been successful without the devotion to duty and hard work of its Enumerators. You will be trained on how to do your work and it is important also that you make sure you know how to do it properly.

1.3 General Overview

As you work with census materials please remember the following:

- a) Advise your supervisor immediately if you are unable to do your work because of illness or any other reason.
- b) The information taken in this census <u>must</u> remain **confidential**. There are penalties laid out in the Statistics Act, 1978, for persons who tell others about information learnt in the course of their census duties. The only persons permitted to see or hear information taken from persons being enumerated are your District Supervisor and officers in the Census organisation to whom he/she reports. You are not to give <u>other enumerators</u> information you get from your own Census Block (CB). Make sure that the forms you have filled in from previous households are not able to be seen by members of the households you enumerate later. These rules are necessary if the public is to have <u>trust</u> in the census organisation and so they can be sure that information given to census enumerators is used for census and statistical work <u>only</u>.
- c) The Statistics Department is forbidden by law to give information about any person to any other person or to an other Government Department. You should inform members of the public of this fact if they raise the matter of <u>confidentiality</u>. The public in Tonga has a fine record of willing cooperation with census-takers, and this is based on past experience with trustworthy enumerators. The census authorities are extremely anxious that this situation continues.
- d) Just as you must keep all information confidential, the nominated Head of the Household, and all other persons in a Household are <u>obliged</u> by law (Statistics Act, 1978) to give answers to the information questions contained in the census schedule. Persons who refuse to cooperate with you by not answering the questions truthfully and completely to the best of their knowledge and ability should be reported by name. Do not get into arguments or difficult situations with respondents. It is not your job to enforce the law. Inform respondents of their obligations under the law, if necessary, and if cooperation is not forthcoming, give their names promptly to your District Supervisor. You can be sure that these situations in Tonga are extremely rare and that you are unlikely to have any trouble of this sort.
- e) Please check all the information that you fill in on your forms very carefully. Make sure that <u>all</u> the Households in your CB have been enumerated <u>completely</u> before you hand them over to your District Supervisor for checking.
- f) Please do not leave blank spaces on Individual Schedules. If a question does not apply to the person you are enumerating put a line through the sections or boxes. This is necessary so that your supervisor and the person who processes the information later know that you did not forget to ask the question/s but that you have deliberately decided that they do not apply to the person being enumerated. If a respondent cannot answer a question and there is no other way of determining the answer from another source write "not known" (NK for short).

1.4 Materials

You will be provided with the following Census forms and materials:

- 1. Prelisting Form (PC1) and Pre listing instructions
- 2. Blank Household Schedules (PC2)
- Blank Personal Schedules (PC3) Check before you begin your enumeration that you have been given enough of these forms to complete the number of households in your Census Block
- 4. Enumerators' Instruction Book
- 5. Map showing boundaries of your Census Block
- 6. Certificate of Authority and Appointment as a Census Enumerator
- 7. A ball point pen
- 8. Stapler for stapling together personal schedules of each household
- 9. Protector for census materials plastic bag

2. Households

2.1 How to Define a Household

The people of Tonga will be enumerated using Household and Individual Schedules in this Census. Each Household will have its own form to which the Individual Schedules of each member of the household will be attached. For this purpose you will have to determine the Household in which each person lives. For the purpose of this census, a household is defined as "**Those persons who usually eat together and share the work of preparing the food and/or the cost of work of providing it**". Normally household members also live and sleep in the same building but experience has shown this is not always so, which is why the definition is based on <u>eating together</u> rather than on living or sleeping in the same building.

As an example, take a family consisting of a father, mother, and teenage unmarried son, an adult married son and his wife and two small daughters. If they share eating arrangements they should be enumerated as <u>one household</u>. This would remain true even if the father works as a night watchman and does not sleep at home six nights a week, or if the teenage son often spends the night away who knows where. It also remains true if, for instance, on census night the men in the household spend the night fishing and stay on a small island offshore in a temporary shelter and return home next morning.

A household may be found in a variety of forms. It may spread over more than one building. Members of a family may sleep in two or even more buildings but share one place to cook and eat. They should be enumerated as one household. Two or more households can be found in one building. Two or more families who share the same building but who do not normally prepare food and eat together should be enumerated as two households, e.g. blocks of flats or servants who have their own quarters. Households may be found in buildings intended primarily for other purposes. A family may live in the back of their shop for instance. Boats tied up to a dock or even pulled up on shore may be permanently lived in and be counted as households. Enumerators should look out for such dwellings and enumerate their occupants as a household if they meet the definition.

In doubtful cases, instead of grouping people into one household who should perhaps be separated, it is better to use two households.

3. Who is Included?

3.1 The Census Date

The major objective of the census is to find the number and characteristics of people in Tonga at one particular point in time, i.e. the night of Saturday 30th November 1996 or, to be exact, in the last minute before the 30th November changes at midnight, to the 1st December. All persons alive in Tonga on Census night are to be included. Babies born before midnight on the 30th November are to be included. Persons who die before midnight on Census night are to be excluded.

It is impossible for an Enumerator to visit all households in a CB on Census Night, and certainly not just before midnight, so that the Enumeration must be spread over a longer period, both before and after the actual Census Night. However the aim should be to record the population as if, suddenly, at one minute to midnight, everything came to a complete stop and the population stood still ready to be counted. In reality you should not be disturbing people this late at night. Keep your visits to households to within reasonable hours. People have a right to be indignant if you disturb them late at night.

3.2 **Present or Absent**

Since "all persons alive in Tonga on Census Night" are to be enumerated, it follows that they are <u>physically present</u> in a Household on Census Night. Each person actually there in a household at the time of enumeration should have a Personal Schedule filled out and attached to the appropriate Household Schedule. The group of people in a household may consist of persons who normally live in that household but may also include visitors or guests who happen to be spending the census night there.

There are likely to be problems enumerating persons moving between households during the census period. Since the enumeration has to take place over several days some persons could be enumerated in both places or possibly to miss being enumerated at all. You will have to take extra care with households which have visitors or those in which some of the usual members are away. If possible enumerate houses where you find out this will be as near to the Census Date as possible so that the possibility of error is minimised. Recent arrivals into a household should be asked if they have been enumerated, and if so in what place. Their names can then be checked in that CB.

Persons staying the night away from their household but <u>not</u> in another household, for instance, somewhere in the open air (fishing or hunting) on night duty, (policemen, nurses, engineers at the power station) should be enumerated as if present in their usual households.

Persons staying overnight in <u>another</u> household, for instance, a woman visiting her sister on another island, a business man staying in a hotel, should <u>not</u> be considered as present in their own household.

Some households will be based in Institutions such as hotels, dormitories, prisons or military institutions. An <u>Institution</u>, for census purposes, may be defined as an organisation providing specified services or performing some general public function for a group of residents or inmates who will normally be unrelated to each other. In listing Households for these Institutions the common eating arrangement still applies, so that it is possible, for instance, that more than one Household will occur in the grounds of one Institution. Where a group of unrelated, institution-based persons have common eating arrangements, they should be treated as one Household and the Head of Household identified as the one who has administrative responsibility, supervises or, by common consent, seems to have some leadership authority.

4. <u>The Census Maps</u>

4.1 Census Districts (CDs)

For administrative purposes Tonga is divided into five Divisions, Tongatapu, Vava'u, Ha'apai, 'Eua and the Niuas. These Divisions contain <u>Districts</u> each with a District Officer. These Districts will be adopted as the major sub-division of the census, the Census District (CD).

4.2 Census Blocks (CBs)

For census purposes the Districts and Villages are further divided into Census Blocks. These subdivisions are the basic area unit of the census and the aim is to have each Census Block contain a group of households which a single enumerator can handle. {In the few exceptions where this has not been possible two enumerators may be allocated to a single block - they will be issued with instructions to ensure that the household numbers given to the block they share are not duplicated.}

4.3 Census Block Boundaries

You will be given a map on which the <u>boundaries</u> of your CB are clearly marked. The number of your CB will be shown on your map and that of the CD of which it is a part. These two numbers <u>must</u> appear on each Household and Individual Schedule that you complete, otherwise it is impossible to put the Schedule into its proper sequence. It is essential that you know where the <u>boundaries</u> of your CB are on the ground, and where these boundaries meet any other neighbouring CBs. All areas must be completely covered so that no Households are left out and so no Household appears in two CBs and is counted twice. Get together with the Enumerators doing CBs adjacent to yours and ensure that each knows the common boundaries. Be especially careful that Households in thinly populated or inaccessible areas are actually included in your count. Each Household will also have its own number and this should be written on all Individual Schedules as well as on the appropriate Household Schedule.

4.4 Locating the Households

A separate set of detailed instructions, regarding locating HOUSEHOLDS by pre-listing on 25th November will already have been given to you.

5. Enumeration Procedures

5.1 **Initial Preparations**

This census will be conducted using a TWO visit system {not including any visit you may have had to make as part of the pre-listing process}. The first visit is to complete details of the households identified in the pre-listing process. Using form PC2 identify the Head of Household (see 8.2 for more on this), record the name and sex of every person who will be in the Household on Census Day, and complete form PC3 for each member of the Household, including children and babies.

If on your first visit you identify "difficult" or unusual households which may require your special attention, a second visit to the household may be arranged for the 2nd or 3rd December. You may ask persons in the Household to have information ready for you on your second visit.

You <u>must</u> make a second visit to all households on 2nd or 3rd of December to confirm information supplied on your first visit on 29/30th November. In particular, you need to check with every household using the information provided on the PC2 to make sure that each person listed has a PC3 completed and had spent the night of 30th November in the Household, and that persons listed but spending the night of 30th November in another Household is not included. Any persons not listed in PC2 but who spent the night of November 30th in the Household must be included in the PC2 and a PC3 completed for that person.

Starting on November 29th make up your plan of action for the first visit, in which the Household and Personal Schedules (PC2 and PC3) will be completed, by breaking down the total area of your CB into daily workloads. Your programme should allow for the possibility that you may encounter bad weather or other delays. The final date of the enumeration, the day on which all Schedules must be completed and handed in to your District Supervisor, must be adhered to. Checking, coding, etc. must begin as soon as the enumeration is complete and preliminary results announced promptly so that delays in getting your results into your District Supervisor should be strenuously avoided.

In special instances, where households are very isolated, as on remote islands for instance, it will be possible to get permission from your District Supervisor to make only one visit and complete all the forms at one time. In these instances you must be quite sure that your enumeration is as close to the situation as it will be on the Census Date as possible.

As you do your enumeration, please try to keep your schedules in good order. In the real world it is sometimes impossible to keep paper clean and completely dry, but remember that others have to process and read your work so that the sheets must be kept legible. If you accidentally spoil a Schedule, put a heavy line across it, corner to corner, and begin another. The canceled ones should all come in with your others; do not throw them away. All the schedules you are issued must come back to your Supervisor, completed, unused or spoilt.

You should also carry your Certificate of Authority and Appointment as Census Enumerator. This should be shown to the persons you interview before you begin.

Usually Census Enumerators are appointed to communities which they know well and in which they are well known. This has great benefits for the accuracy of the enumeration and, usually, the friendly atmosphere in which it is conducted. Occasionally though, past history may make your dealings with an individual or family embarrassing, to you or to them. If you have a case like this, inform your District Supervisor so that he/she can make arrangements for someone else to do this Household.

Remember that your duties as an Enumerator are not complete until your Supervisor is satisfied with your work. If your forms are not complete your Supervisor will require you to complete them before certifying your work. If questions are not all filled in you will be required to go back to the uncompleted households and get the information. The Government Statistician will retain the authority to get you to complete or redo Schedules about which questions or doubts occur during later processing.

5.2 **Relations with the Public**

It is important for the census that it be conducted in a good and friendly atmosphere; the following are some suggestions on how to keep it that way.

There should be no doubt in the minds of your respondents about your right to ask the questions specified in the census schedules. You should show your Certificate of Appointment and Authority to all respondents and they also have the right to see the Schedules (uncompleted) to make sure that the questions you ask are relevant to the census.

Please be considerate of your respondents' rights, privacy and feelings.

Let your respondents know when it is likely you will make you second visit, and try to stick to the time you tell them. However, you should be firm about interviewing the Head of the Household and other responsible adults individually. You will notice that at the end of the Individual Schedule you are to note whether the person replying to your questions is the same one as is named on the schedule. It will not always be possible to question directly all person and, in some cases, such as children, not at all desirable, but we are hoping to get a high proportion of adults, particularly women, answering questions for their own form. First-hand information is usually more accurate than hearsay or second-hand information although the latter is much better than nothing. This applies particularly to adult females who are likely to have much more accurate information about their own children's' date of birth, and other information related to them, than anyone else. You should be very careful to remind mothers to remember all their children, particularly the youngest and, of these, particularly the girls.

5.3 Conducting the Interview

Your success in collecting census information depends on knowing what to do in each household and doing it quickly and efficiently. Some guidelines for interviewing are:-

- Confine your interviews to the responsible members of the household. The Head of the Household must be interviewed and adult females should also be interviewed if possible. Do not interview children, servants or neighbours of a household about its members except to find out the best time to call back if no responsible member has been available on the first two visits.
- Never permit the person you are interviewing to examine a form filled out for another Household. Keep such forms well out of sight to avoid such possibilities arising.
- Do not show surprise or disapproval at any answers you may get to the census questions, including the way you look or by the tone of your voice. Your job is to record the facts, not reform society.

- Do not reveal your opinion of the census questions to respondents. The respondent should feel that these are serious matters and that their answers are important. Ask the census questions as if you are confident that you will receive an answer.
- Ask the questions in the exact order in which they appear on the form.
- Maintain a friendly manner. Avoid getting into argument or controversial discussion. Remember you have a lot of work to do, it must be done well and many people must be interviewed in the time available.

6. **The Household Schedule (Form PC2)**

6.1 **Function of the Household Schedule**

The Household Schedule applies to the household group as a whole and is the form to which all completed Individual Schedules must be attached to form a "file" on each household. Fill in the spaces for Enumerators' Name (i.e. your own) Census District Number, Census Block Number, Village or Locality Name and Household Number. This household number will be unique to this Household. All households within your CB should be numbered, beginning from "1" consecutively.

Full names of all Persons who are to be enumerated on Census Date should be filled in next, beginning with the person you identify as Head of the Household. The Head is usually named by the household members, as being the person most responsible for their well-being. You will find that in some households the person who would normally be identified as the Head is absent so that another person must be nominated as the Head for census purposes. Households may be headed by persons of either sex, or even in exceptional cases, where all adults are temporarily absent, by an older child. Visitors should be listed last. Newborn babies not yet named may be listed as "Baby'. The sex of each Household Member should then be checked off. Sometimes, as with babies, the sex of the individual is not obvious. In such cases make sure you know by asking the Head of Household. Do not guess.

If there are more than 24 Household members, use a second Household Schedule for the remaining persons. Cross out the word "Head" on the second Household form and cross out the "Total" boxes on the first Household form. Add the totals for Males, Females and Persons and include them on the form which contains the final names of persons in the Household. After your final visit, add the totals for all Males, Females, and Persons and write them in the spaces so labeled.

If you find on your second visit that some persons have left the Household <u>and were not there on</u> <u>Census Date</u> you should delete their names from the list on the Household Form and mark the Individual Schedule "Not Present" but do not throw it away. It should come in with the other completed forms, but attached to the back of the "files". If you know where they went, put the name of the village or locality under the "Not Present" e.g. Gone to Kolonga (or wherever). This information may be useful if it appears later that they were not enumerated at all. Similarly, if you find on your second visit that some persons have unexpectedly arrived <u>and were present at Census Date</u>, their names should be added to the Household Schedules, and Individual Schedules filled out for them.

One of the functions of the Household Schedule is to allow a Preliminary Count of the Population (Males, Females, Total Persons) to be issued by the Government Statistician and this information is compiled quickly from the Household Schedule.

Circle the appropriate characteristics of the household required in the lower portion of Form PC2 by ascertaining the type of building (define the principle building if there is more than one in the household). Ascertain the source of water supply, type of latrine, source of energy for lighting and for cooking. Identify the household goods and the livestock that a household may have using the pre coded list on form PC2. Also ascertain whether crops or squash have been grown at any time in 1996, the tenure of the house as well as method of household waste disposal.

7. The Personal Schedule (Form PC3)

7.1 Function of the Personal Schedule

The Personal forms are the most important part of the census and will contain all the information collected for each Individual in the Household. Each individual person in the Household has a separate form filled out for them with the answers to all the questions which apply to them. Fill out all the answers carefully and completely, putting a line through the boxes and sections not applying to the individual being enumerated. The small square boxes to the right of some answer boxes are for coding the responses for entry of the data into the computer. They should be left alone and not written over.

The questions on the form PC3 are to be completed by putting a circle around the appropriate box (the numbers in the box are for office coding purposes) or by filling in the highlighted boxes with the information provided by the person being interviewed. An indication of the wording for each question is given for each section described below in Section 8. Of course the wording will have to vary slightly according to whether you are interviewing the individual being enumerated or if someone is answering on behalf of an individual - for example a mother responding for a baby or young child, or someone who is absent.

7.2 Village Name

This box, on each form, should have the village name written in.

7.3 Census Block Number (CB No.)

This box, on each form, should be completed with the number of the Census Block to which you have been assigned. It identifies the Division, district and village which is being enumerated.

7.4 The Household Number

Each separate Household should be given its own number and this should be written into the box, so labeled on each individual schedule. Please make sure this number is always the same as that written on the Household Schedule.

7.5 The Person Number

Each Personal Schedule will have a number, unique to the Individual being enumerated, and this should be written in the box so labeled.

Using these numbers in combination, each inhabitant of Tonga will have a unique number which will be used to link them with other members of their Household and with the information relating to them in the census processing stage. No names will be used beyond the processing stage.

8. **The Individual Questions**

8.1 **Question 1 - What is your full name?**

This question should be easily answered in almost all cases. It is asked for identification purposes only; for example, checks can be made to make certain that the person is not counted twice.

Names should be written following the custom of the person being enumerated.

All names should be written in, and please see that the spelling of all names is correct. "Unofficial' names, that is "nicknames", 'petnames" etc. should not be used. If a very young baby has not yet been named write "Baby" in the box

8.2 **Question 2 - What is your relationship to the Head of the Household**

This question is asked of everyone in the household to show how each is related to ONE KEY PERSON, that is the person identified as the Head of Household, who should be identified first - person number 001. Then all other persons in the Household are shown in the way they are related to the Head in the following way, e.g.

Wife of Head of Household Son of Head of Household Daughter of Head of Household Father of Head of Household of Head of Household Mother Brother of Head of Household Daughter of head of Household's son, or in shorter form, son's daughter Daughter's son Daughter's husband Daughter's husband's mother Adopted son ("adopted" here means that the son is not the "natural" or "biological' son of the Head but has been "adopted" by him/her as a son. Legal and customary adoption are not treated differently).

The same system applies to marriage as to adoption. Marriage is recognised by the census whether it is legal or by custom, "de facto", consensual union, etc. as one and the same. As an enumerator you should not treat the two types separately. "Wife" and "Husband" should be used if they relate to persons in a domestic relationship who think themselves as "married".

Relatives who are not close, e.g. Wife's sister's husband's mother, (more than three parts) should be described as "Relative". Persons who are not related but who are living in the household) e.g. friends of the Head, housekeepers, unrelated visitors) should be shown as "No Relation".

Do NOT use English terms such as nephew, uncle, aunt, brother-in-law, mother-in-law but use the Tongan system, e.g. brother's son, mother's sister's husband, father's sister, wife's mother.

8.3 **Question 3 - Sex**

This question should be answered for all persons simply by circling the appropriate box on the Schedule. In cases where the sex of the individual is not apparent, for instance with very young children, the Head of the Household or other responsible person should be questioned. There is no need to take your investigation further than this. It <u>is</u> important that this question be answered correctly so do not guess in doubtful cases, but do not go to extremes.

8.4 **Question 4 - Please tell me your Date of Birth**

This question is one of the most important in the census, and for some people may be one of the hardest to answer with certainty. You are likely to find many people who do not know their exact date of birth, and now have no sure way of finding out. Mis-statement of Age is one of the worst problems which census analysts have to put up with and happens in all censuses. Some patience and good sense can be used to reduce the errors and arrive at the best response.

The best source of information for dates of birth will be Birth Certificates or Church records where these exist. One reliable date of birth in the household may help others in the same household remember their own birth date more accurately. For example, if the wife's birth date is known, it may be possible to work out the husband's date approximately if it is known whether he is older or younger than his wife. If they were in the same class at school for instance, they would be close to the same age, at least within a year or two. You will be able to think of similar examples yourself.

A Calendar of Historic events will be provided to assist you in determining approximate dates of birth together with a table which converts date of birth to age. Often parents or relatives will remember the birth or the approximate age of a person related to the occurrence of some special event, e.g. the Coronation of the present King or the outbreak of War in the Pacific with the bombing of Pearl

Harbour in December 1941. Someone who was just a baby (not yet walking) when this occurred will have been born in 1941 or 1940. If someone is remembered as having jut finished primary school at the time, it is likely that the person was about 12 years old and so would have a date of birth of about 1929. Other examples and possibilities will occur to you.

The appearance of the person being enumerated can help you judge the approximate age, and you can fix the date of birth more exactly by using the Calendar of Historic Events. For example, find an event which happened at some time when the person's age was known or can be guessed at fairly accurately and work out the date of birth by subtracting the age at that time from the year of the event. It is important not to confuse remembering "an event which happened when I was x years old", and remembering hearing about the event perhaps some time after it actually occurred.

You must have a year of birth for <u>everyone</u> counted in the census. Where the day and month are known as well as the year write them in the space provided. Where the birth date must be estimated, write the year only.

As a check please use the table provided to establish with the persons age in years, confirming it with the respondent by saying **So you must be xx years of age ?** Write the age in the age box.

8.5 **Question 5 Where were you born**

Ask which village this person was born. If the person was born within the Division of Tonga you are helping to enumerate just enter the name of the village. If they were born elsewhere in Tonga write down the name of village and the island group. If the person was born abroad state the name of the country only. Where a mother traveled to another area (say to a hospital) in order to give birth, record the village or country in which she normally resided at the time the person was born.

8.6 Question 6 - Ethnic Origin - Please tell me what ethnic group you consider you belong to

This question is related to a person's ancestry and/or the ethnic group with which they identify. The statement of your informant should normally be accepted. The most frequently occurring answer will be "Tongan". This and the more common responses are pre coded in the questionnaire so please circle the appropriate box. Where there is no appropriate precoded answer - please write in the ethnic group declared by the respondent. Persons from other Pacific Islands should be described according to the island group they come from e.g., Samoan, Niuean, Fijian, Solomon Islander etc., Persons of Indian ancestry but from Fiji should be described "Fiji Indian". Persons of Asian descent should be described as Chinese, Japanese, Korean, Indian, Pakistani etc. All people of white European descent (this will include white Australian's, New Zealanders and Americans) should be classified as "European".

Where ancestry is recognised as "mixed", but involves some Tongan ancestry the person should be described as <u>Part-Tongan</u>. Tongan-European, Tongan-Chinese, Tongan-other Pacific Islander, etc. should all be classed as Part-Tongan for census purposes. Persons who declare themselves as of mixed ancestry, but with no Tongan have their own coded box in the questionnaire.

8.7 <u>Ouestion 7 - Please tell me if you have ever married (if yes) - Are you now married, widowed</u> divorced or separated.

There are only four options in the answers to this question. You should ask if the person has <u>ever</u> <u>married</u>. Then if the person has ever married, is she/he now <u>married</u>, or <u>widowed</u>, or <u>divorced/separated</u>? -

Never Married applies to a person who is not now and never has been married.

<u>Married</u> applies to a person who is <u>presently</u> married, and who normally lives with the spouse. The census is not trying to find out who is legally married and who is not. No distinction should be made between couples whose marriage has been sanctioned by Church or State and those couples living together as husband and wife.

Widowed is for a person, male or female, who has been married but whose spouse has died.

<u>Divorced/Separated</u> is for a person who has been married but has been divorced or is separated, either legally or by custom, and no longer thinks of the former partner as a spouse. A person whose spouse is temporarily absent but who intends to return should be shown as Married.

Although it is possible for a person to have been in each of theses categories at one time, at the time of the census a person may be only in <u>one</u>.

8.8 **Question 8 - Religion - To which church or faith do you belong**

Circle the appropriate pre- coded box for an individual's congregation. Give details of a faith or congregation alongside the 'Other' box provided it does not appear in the pre coded boxes.

Other churches should be written in full. If persons say they have no religion circle the "None" box. If they do not wish to answer this question they have a right not to do so; there is a pre coded box for those who decline to answer this question.

Young children may be assumed to have the religion of the Head of the Household unless questioning indicates otherwise.

8.9 **Question 9 - Do you normally live here in this village**

This question is included in the census to separate those who usually live in the village from those who do <u>not</u> usually live there and whose presence is temporary. If the person usually lives in this village being enumerated circle <u>yes</u>. If the person is in the Household at the time of enumeration but is not considered to be a usual member normally living elsewhere, circle <u>no</u> and write the <u>place</u> (name of village) where the person usually does live. The distinction between being in residence and merely visiting is sometimes a difficult one to make, but in this case we should accept <u>6 months or more</u> as "residence". If the individual normally resides on another Tongan island enter the name of the island group as well as the village. If the person is normally resident abroad state the name of the country only.

8.10 **Question 10 - How long have you been staying in this place**

Write down the length of time this person has lived in his/her usual place of residence.

8.11 Question 11 - Are you currently attending school or pursuing some kind of education or training

This question is designed to record those who are attending school or undergoing some kind of training..

8.12 **Ouestion 12 - What is the highest level of Educational Attainment currently achieved**

Ask this question of everybody. The highest level of formal education received so far by the person being enumerated should be shown here. Write in the highest <u>Class</u> or <u>Form</u> completed in a persons education if they have completed only some primary or secondary education.

8.13 Question 13 - What is the highest qualification obtained to date (Ask only of those aged 11 and over)

Those with <u>Post-Secondary</u> qualifications should have these described together with the field or major subject e.g. BA degree in Economics, Diploma in Accounting, Teachers' Certificate, etc.

8.14 Question 14 - Can this person read and write in English or Tongan languages (Ask only of those aged 6 and over)

There will be a paragraph provided in English and Tongan languages provided to test this person's ability to read. Each person will also be required to write a sentence in English and Tongan to prove that they can write in both languages. It is required that each person can read <u>and</u> write in each language before the "Yes" box is circled. If the person can read and cannot write, or cannot read but can write, the "No" box is circled.

8.15 Question 15 - What form of work did you undertake last week (Ask only of those aged 15 and over)

Explain that 'work' includes helping without pay in a family business and with farming/fishing or handicrafts making.

Try and identify women who claim to do "housework" but also spent some time in activity such as weaving, tapa making or working in the bush and circle box 3 in the yes section of question 15.

If the person did no work because they were unemployed, did housework only, were full time students, retired/too old or disabled/handicapped - circle the appropriate box as described below then go straight to question 21. If the person's economic activity does not fall in either of category 1 or 2, circle category 9 and specify type of activity, then go to question 21.

Unemployed

For persons who during the reference week were without work i.e. they did not have a job either in paid employment or were not self-employed, but at the same time were seeking work or looking for a job. Circle No.2 in category 2.

Did housework only

For persons who perform domestic work such as cooking, cleaning, and child rearing in their own homes circle box 3. Persons engaged in domestic work for pay in other people's houses are better classified by circling box 1 in category 1. Housewives who spend a significant portion of their time during the reference week producing saleable items in the household - notably handicraft makers, would better be described by circling box 3 in category 1.

Student only

Any person who during the reference week has attended any regular educational institution, public or private at any level of education as a student. Circle box 4 in Category 2.

Retired/Too Old

For persons of either sex not economically active, who receive income from property or other investments. For persons at the end of the age range who do not contribute significantly to the household economy either from incapacity or from "being excused" because of their age. Circle box 5 in category 2.

Disabled/Handicapped

This category is intended to identify persons who are of an age to work but who are unable to do so because of some physical or mental disability. Census enumerators cannot be expected to diagnose medical conditions but it is likely that you will find persons who have disabilities which seriously interfere with the possibility of their doing physical and or mental work, and therefore their prospects of being employed, and it is apparent that their disability is the major cause, they should be put into this category. Circle box 6 in category 2.

Remember to put a line through the questions you have skipped

8.16 Question 16 - What work did you mainly do - Farming/Gardening, Fishing, or Weaving /Making tapa etc.

This question is asked only of those who work mainly in Farming, fishing or handicrafts (or a combination of the three) or who are housewives but also work in these activities. Circle the appropriate box.

8.17 <u>Question 17 - The [food you grow], [fish you catch], [[mats] [tapa] [baskets] you produce] are</u> they for your own family use or is some sold.

Like question 16 This is asked only of those who work in Farming, fishing or handicrafts making.

Establish if the goods produced are ever sold and circle the appropriate box.

8.18 **Question 18 - What is you main Occupation**

Occupation here refers to the kind of work done by a person during the reference week. The principal occupation means the occupation which is regularly followed and to which the person devoted <u>most of his/her time</u>. General or vague entries are not satisfactory. The best short description of a person's occupation is usually his/her job title.

Avoid making vague entries such as labourer, inspector, clerk, repairman etc. You should take some care in your description to give some idea of the level of skill or responsibility involved in the job and what function is performed. Two or more words may be used to describe an occupation properly e.g. farm labourer, dock labourer, accounts clerk, costing clerk, police inspector, health inspector, car repairman, telephone repairman etc.

Avoid "inflating" job descriptions. For example, "engineer" is an occupation which requires a level of education and skill beyond that of a "mechanic" where the occupation can usually be learned by apprenticeship or on the job. Someone who does machinery repairs is more likely to be described as a "mechanic" than an "engineer".

8.19 **Question 19 - What industry or government sector do you work in**

Industry relates to the activity of the establishment in which the person worked during the reference week. In other words, it refers to the place where the person is employed or the source from which his/her income or wage is derived. It is important that the distinction between industry and occupation is clearly understood. Occupation refers to the type of job or actual work of the person. Electrical engineer, lorry driver, typist, doctor, lawyer are examples of occupation. Industry on the other hand refers to the activity of the establishment in which the person works. Thus a typist employed in a motor engineering company would have as the occupation "typist" and the industry "motor engineering".

In order to assist the Statistics Department with the Classification of Industry, it has been necessary to ask the name of the individual department or company for whom the person being enumerated works. For large employers, particularly Government, Statutory Boards and large Companies, the Department or division where the person works should be given.

8.20 <u>Question 20-Are you Self-employed, an Employer, a Paid Employee or an Unpaid Family</u> <u>Worker</u>

Enter here the status of the principal occupation in which the person was employed (or would have been if they hadn't been absent from work through sickness or leave) during the reference week, establish what sort of paid employee the individual is, Government, Quasi Government or Private, see below.

- <u>Own Account Worker</u>
 A person who operates his/her own farm or business or is engaged independently in a trade or profession <u>without having any paid worker to assist him/her</u>.
- 2. <u>Employer</u> An employer is a person who operates his/her own farm or business or is engaged independently in a profession or trade and <u>employs one or more paid workers</u>.
- 3. <u>Employee Government Employee</u> A person who works for the Government
- 4. <u>Employee Quasi-Government</u> A person who works for Quasi-Government (Statutory Boards)
- 5. <u>Employee Private</u> A person who works for a private firm or company such as Morris Hedstrom, Gateway Rentals etc.
- <u>Unpaid Family Worker</u> A person who works without pay of any kind in a business or economic enterprise operated by a related person living in the same household.
- 7. <u>Other</u> For persons who may not fit into any of the above categories 1 - 6.

8.21 **Question 21 - Please tell me if your real father and mother are still alive**

Each person is to be asked if their Real Father and Real Mother are still alive or if they have died. In the case of Mothers who are still alive and who are living in this Household with their offspring their Person Number is to be recorded. The information from these questions is used by the census analysts to estimate levels of mortality and fertility. It is important that they be answered correctly. <u>Real</u> for the purposes of the census means true blood-related parents. Parents who may have adopted or looked after the person being enumerated are not to be included here. In cases where the person does not know about their real parents it is better to circle the "Don't Know" box.

8.22 <u>Question 22 - How many live-born children have you had. - How many are living in Tonga and How many elsewhere .</u>

Note: Question 22 is to be asked only of Females aged 15 - 49

Females born since 1981 are assumed to be too young to have borne children and need not be asked these questions. <u>All</u> females born in 1981 or before must be asked these questions. The questions should preferably be asked of the female herself and some discretion in this may be required of the enumerator.

In all cases it is the mother's <u>Own Children</u> born to her who should be counted, not including adopted children (who should be counted with the mother to whom they were born). These questions are used to estimate the fertility of Tongan women and since we have no other reliable way of measuring fertility in Tonga, it is important that the questions be answered fully and accurately. The fertility estimates are essential for planning, especially in the areas of education, health and in the making of projections of Tonga's future population.

<u>Number of Children ever born Alive</u> includes all children born to the mother, boys and girls separately. As long as these children were <u>alive at the time of the birth they should be included</u>, even if they died soon after; these cases are easily omitted and need special care from the enumerator. Ask for the number of boys and the number of girls - which when added together should agree with the total stated

Did you give birth to any babies/children which were born alive but have subsequently died.

Try to establish if the mother gave birth to a baby (or babies) which was alive at the time of birth (i.e drew breathe, cried etc. but not a "stillbirth") but has subsequently died (even if it only survived for a few minutes). Include also offspring who died at a later age e.g. a son who may have died in an accident. It is important to ascertain all living babies a mother has given birth to.

Add the numbers of children shown in the three sets of boxes and enter total for the number of boys, girls and total children ever live-born to the mother.

And What Date was your last (live born) Child Born

<u>Last Live Child Born</u>. Experience with censuses show that this child is sometimes forgotten completely and is left out of the census count. Ask for the date of birth of the most recent child (even if it has subsequently died). Take care that the <u>most recent</u> i.e the youngest child is included and the questions referring to it are correctly answered.

What is the Sex of your last child.

Circle appropriate box

Is he/she still alive

Circle appropriate box

What Age were you when your first (live born) Child was Born

<u>Age of Mother at the birth of her First child</u>. This question applies to the mother's first live birth whether the child is still alive or not. The age should be given in completed years.

8.23 End Section - Source of Information

At the end of every Personal Schedule (Form PC3) you are required to circle the appropriate box as to whether the person being enumerated supplied their own answers to the questions concerning them, or whether the information was supplied by another person in the Household. If answers were given by another person then you are to give that person's number in the box provided.

The interview for this individual in the household is finished. Thank them and move on to the next numbered person in the household.

9.0 After the Enumeration

When you have completed all your Household schedules and all your Personal Schedules, they should be handed to your Supervisor. All Personal Schedules belonging to one Household should be together in numerical order of the Person Number of each Schedule and attached, behind, to the household Schedule to which they belong. You then have a "file" on each Household in your Block. These files should also be in numerical order, by Household Number.

Your Supervisor will check through all your forms to see that the work is complete and that the standard is acceptable. Where deficiencies are found your Supervisor may send you back to your Block to correct the problem. When all the work has been done to the satisfaction of your Supervisor he will certify to the Government Statistician that your work has been accepted and approved. The Government Statistician has the right to question the standard of the work and if necessary, instruct the Supervisor to have the problem corrected.

MAJOR, SUB-MAJOR, MINOR AND UNIT GROUP TITLES

MAJOR GROUP 1 LEGISLATORS, SENIOR OFFICIALS AND MANAGERS

| 11 | LEGISLATORS AND SENIOR OFFICIALS |

- 6154 Hunters and trappers
- 62 SUBSISTENCE

AGRICULTURAL AND FISHERY WORKERS

621 SUBSISTENCE AGRICULTURAL AND FISHERY WORKERS

6210 Subsistence agricultural and fishery workers

MAJOR GROUP 7 CRAFT AND RELATED TRADES WORKERS

71 EXTRACTION AND BUILDING TRADES WORKERS

- 711 MINERS, SHOTFIRERS, STONE CUTTERS AND CARVERS
- 7111 Miners and quarry workers
- 7112 Shotfirers and blasters
- 7113 Stone splitters, cutters and carvers
- 712 BUILDING FRAME AND RELATED TRADES WORKERS
- 7121 Builders, traditional materials
- 7122 Bricklayers and stonemasons
- 7123 Concrete placers, concrete finishers and related workers
- 7124 Carpenters and joiners
- 7129 Building frame and related trades workers not elsewhere classified
- 713 BUILDING FINISHERS AND RELATED TRADES WOKRERS
- 7131 Roofers
- 7132 Floor layers and tile setters
- 7133 Plasterers
- 7134 Insulation workers
- 7135 Glaziers
- 7136 Plumbers and pipe fitters
- 7137 Building and related electricians
- 714 PAINTERS, BUILDING STRUCTURE CLEANERS AND RELATED TRADES WORKERS
- 7141 Painters and related workers
- 7142 Vanishers and related painters
- 7143 Building structure cleaners

72 METAL, MACHINERY AND RELATED TRADES WORKERS

- 721 METAL MOULDERS, WELDERS, SHEET METAL WORKERS, STRUCTURAL METAL PREPARERS, AND RELATED TRADES WORKERS
- 7211 Metal moulders and coremakers
- 7212 Welders and flamecutters
- 7213 Sheet-metal workers
- 7214 Structural-metal preparers and erectors
- 7215 Riggers and cable splicers
- 7216 Underwater workers

722 BLACKSMITHS, TOOL-MAKERS AND RELATED TRADES WORKERS

- 7221 Blacksmiths, hammer-smiths and forgingpress workers
- 7222 Tool-makers and related workers
- 7223 Machine-tool setters and setter
 - operators
- 7224 Metal wheel-grinders, polishers and tool sharpeners
- 723 MACHINERY MECHANICS AND FITTERS
- 7231 Motor vehicle mechanics and fitters
- 7232 Aircraft engine mechanics and fitters
- 7233 Agricultural or industrial-machinery mechanics and fitters

724 ELECTRICAL AND ELECTRONIC EQUIPMENT MECHANICS AND FITTERS

- 7241 Electrical mechanics and fitters
- 7242 Electronics fitters
- 7243 Electronics mechanics and services
- 7244 telegraph and telephone installers and servicers
- 7245 Electrical line installers, repairers and cable jointers
- 73 PRECISION, HANDICRAFT, PRINTING AND RELATED TRADES WORKERS

731 PRECISION WORK IN METAL AND RELATED MATERIALS

- 7311 Precision-instrument makers and repairers
- 7312 Musical instrument makers and tuners
- 7313 Jewellery and precious-metal workers
- 732 POTTERS, GLASS-MAKERS AND RELATED TRADES WORKERS
- 7321 Abrasive wheel formers, potters and related workers
- 7322 Glass-makers, cutters, grinders and finishers
- 7323 Glass engravers and etchers
- 7324 Glass, ceramics and related

decorative

painters

- 733 HANDICRAFT WORKERS IN WOOD, TEXTILE, LEATHER AND RELATED MATERIALS
- 7331 Handicraft workers in wood and related materials

- 7332 Handicraft workers in textile, leather and related materials
- 734 PRINTING AND RELATED TRADES WORKERS
- 7341 Compositors, typesetters and related workers
- .743 TEXTILE, GARMENT AND RELATED TRADES WORKERS
 7431 Fibre preparers
- 7431 Fible preparets
- 7432 Weavers, knitters and related workers
- 7433 Tailors, dressmakers and hatters

- 7434 Furriers and related workers
- 7435 Textile, leather and related patternmakers and cutters
- 7436 Sewers, embroiderers and related workers
- 7437 Upholsterers and related workers
- 744 PELT, LEATHER AND SHOEMAKING TRADES WORKERS
- 7441 Pelt dressers, tanners and fellmongers
- 7442 Shoe-makers and related workers

MAJOR GROUP 8 PLANT AND MACHINE OPERATORS AND ASSEMBLERS

81 STATIONARY-PLANT AND RELATED OPERATORS

| 811 | MINING- AND MINERAL- |
|-----|----------------------------|
| | PROCESSING-PLANT OPERATORS |
| | |

- 8111 Mining-plant operators
- 8112 Mineral-ore- and stone-processingplant operators
- 8113 Well drillers and borers and related workers
- 812 METAL-PROCESSING-PLANT OPERATORS
- 8121 Ore and metal furnace operators
- 8122 Metal melters, casters and rolling-mill operators
- 8123 Metal-heat-treating-plant operators
- 8124 Metal drawers and extruders
- 813 GLASS, CERAMICS AND RELATED PLANT OPERATORS
- 8131 Glass and ceramics kiln and related machine operators
- 8139 Glass, ceramics and related plant operators not elsewhere classified
- 814 WOOD-PROCESSING-AND PAPERMAKING-PLANT OPERATORS
- 8141 Wood-processing-plant operators
- 8142 Paper-pulp plant operators
- 8143 Papermaking-plant operators
- 815 CHEMICAL-PROCESSING-PLANT OPERATORS
- 8151 Crushing-, grinding- and chemicalmixing-machinery operators

- 8152 Chemical-heat-treating-plant operators
- 8153 Chemical-filtering- and separatingequipment operators
- 8154 Chemical-still and reactor operators (except petroleum and natural gas)
- 8155 Petroleum and natural-gas-refiningplant operators
- 8159 Chemical-processing-plant operators not elsewhere classified
- 816 POWER-PRODUCTION AND RELATED PLANT OPERATORS
- 8161 Power-production plant operators
- 8162 Steam-engine and boiler operators
- 8163 Incinerator, water-treatment and related plant operators

817 AUTOMATED-ASSEMBLY-LINE INDUSTRIAL-ROBOT PERATORS

- 8171 Automates-assembly-line operators
- 8172 Industrial-robot operators
- 82 MACHINE OPERATORS AND ASSEMBLERS

821 METAL AND MINERAL-RODUCTS MACHINE OPERATORS

- 8211 Machine-tool operators
- 8212 Cement and other mineral products machine operators
- 822 CHEMICAL-PRODUCTS MACHINE OPERATORS
- 8221 Pharmaceutical and toiletry-products machine operators
- 8222 Ammunition and explosive-products machine operators
