## Overview

### CONSUMER PRICE INDEX FOR NOVEMBER 2022 AND REVISED OF ELECTRICITY

(Base Period: September 2018 = 100.0)

Consumer Price Index decreased by **0.5%**,  
Inflation Rate is **11.1%**

The Consumer Price Index covers price changes in Tongatapu and Vava'u. The weights were derived from the Household Income and Expenditure Survey (HIES) (2015-2016). Also, the groups use all different grouping of the Classification of Individual Consumption by Purpose (COICOP).

**Note:** This report includes a revision for the CPI report of October 2022, which resulted in CPI decreased by **0.3%** from September 2022 and revised inflation rate for October is **13.1%**. These changes are also highlighted in the tables. November 2022 CPI report use the revised October 2022 results. Please contact the Department for more details of this.

1. The **Consumer Price Index (CPI)** for **November 2022** decreased by **0.5%** from **120.4** in the previous month to **119.8**. Over the previous two months, the index for all items decreased by **0.3%** in **October 2022** and increased by **0.3%** in **September 2022**.
2. When comparing the **local** and **imported** indices for **November 2022** to the previous month, Local index decreased by **0.9%** and import index also decreased by **0.1%**.
3. The **rate of inflation** for **November 2022** is **11.1%** compare to **13.1%** in previous month. The **annual Inflation rate** for the same month of previous year, **November 2021**, was **8.2%**.
4. When comparing the **annual change** in the **local** and **imported indices** for **October 2022**, the local index recorded an increase by **14.5%** and import index also increased by **8.6%**.

## About the Consumer Price Index

The Monthly Consumer Price Index (CPI) published by the Statistics Department is accepted as the official measure of inflation in Tonga. The CPI measures the changing price of a fixed basket of goods and services purchased by Tongan households. The selection and relative importance of the goods and services in the CPI basket represents the overall expenditure pattern of Tongan households.

The CPI is used by ministries and other agencies for monitoring economic performance and by the National Reserve Bank of Tonga to help set monetary policy.

The new index reference period of September 2018 (=100.0) was first published for the month of October 2018. Data from the Household Income and Expenditure Survey (HIES) 2015-2016 was used to determine the expenditure pattern of consumers. The classification used for publication will change to the [COICOP](#) classification. The proportion of expenditure on each item or group is referred to the weight. The previous reference period was October 2010 based on the results of HIES 2009.

There are 156 items in the Tonga basket classified to twelve major groups. The items are further classified by whether they are imported or have been produced locally. The CPI covers price changes in Tongatapu and Vava'u. The pricing outlets selected in Tongatapu and Vava'u include the Talamahu and 'Utukalongalo market (agriculture produce), the Vuna Wharf (fresh fish), super-markets, village stores, petrol stations, restaurants, airlines etc.

The groups and their index reference period weights are shown in the table below.

### Further definitions

A **price index** measures the change in price between time periods for a given set of goods and services. It summarises a set of prices for a variety of goods and services collected from a number of outlets.

The **index reference period** is the benchmark to which prices in other periods are compared (e.g. if the index number in a later period is 115, prices have increased by 15.0 percent since the index reference period). Prices for later periods can also be compared in similar fashion.
